

# DIY i♥u Pop-up Card

## You'll need:

- ★ 2 Pieces of 65lb Cardstock Paper (in 2 different colors)
- ★ Sharp knife (mini snap blade or X-Acto knife would work best)
- ★ Double sided tape
- ★ Printer

## How to:

1. Print the Template page on the cardstock color you will be using for the inside as the pop-up.  
(Yes, it's mirrored so the template lines do not show)

2. Grab your knife and slit through the solid lines. **DO NOT CUT ON THE DOTTED LINES!** The 2 hearts will be hollowed out, so don't worry.

3. Fold on the dotted lines.  
*See how on next page!*

\*The top and bottom dotted lines will crease outward (visible, same direction as the mid-page fold)

\*The middle dotted lines will crease inward (not visible, opposite to mid-page fold)

4. Cut around the outer border solid line.
5. Fold your second cardstock piece of paper in half. That's going to be the outside of the card.
6. Place your pop-up cardstock piece inside the outer layer. You should have a border around the inside pop-up piece. →
7. Grab your double sided tape and place pieces on the pop-up piece where the cutouts are not present. ↓

8. Stick your taped pop-up piece to the inner right side of the outer layer of the card.

9. Once the right side is in place, cover the pop-up side of the inner layer with double sided tape. **\*Do not** place tape on the letter parts of the Cardstock. Those are the pop-ups! ↓

10. And you are finished! Decorate the front side of the card. I opted for an origami heart. ↓

Finish your card by adding a personal message on the inside!
