

# SOFTWARE AND TECHNOLOGY

**PF**  
PRODUCT FOCUS

THERE ARE MORE software and technology products available for flooring businesses than ever before, whether for the office or the job site. Flip through some of these offerings in the following pages. Does your company have a product that should be featured here? Send it to us at [editors@woodfloorbusiness.com](mailto:editors@woodfloorbusiness.com).

## Anderson Tuftex

The award-winning Floorvana+ is a tool designed to help find flooring to match any space. Images of rooms can be uploaded to see flooring in different installation options and design visions through a real-time augmented reality experience.

[andersontuftex.com](http://andersontuftex.com)

## C/F Data Systems

Structure BlueConstruction is an end accounting package that provides solutions to manage all areas of construction operations including quoting, billing, inventory, payroll and project management, the company says.

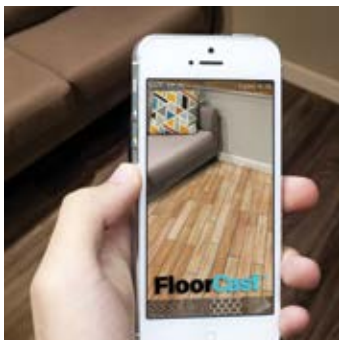

[cfdatasystems.com](http://cfdatasystems.com)

## Fidbox LLC

The HMbox monitors the job site and substrate pre-installation, and the Fidbox (embedded into the floor) monitors the product, substrate and job site post-installation. These pre- and post-installation tech tools save the contractor time, money, aggravation and possible litigation, the company says. The devices create reports that can be printed or emailed.

## FloorCast

FloorCast is an augmented reality flooring visualizer and cost calculator. The app uses computer vision algorithms to locate a floor and replace it with a 3D model of a new floor, automatically calculating the square footage of the space at the same time, the company says.

## Floorcloud

Floorcloud's job-site sensors enable contractors to monitor and communicate site conditions (ambient temperature, humidity, dew point, substrate temperature/RH%) remotely in real-time to improve hardwood flooring installation outcomes. The new EMC calculator enables installers to easily follow National Wood Flooring Association equilibrium moisture content guidelines, the company says.

## Housecall Pro

Housecall Pro is easy-to-use software for home service companies, the company says. It services more than 15,000 businesses and offers online booking, follow-up marketing, recurring service plans, review management, scheduling, dispatching, estimates, invoicing, live-map GPS, reporting, credit card processing and sales proposal tools.

## Infor

Infor CloudSuite Distribution is an ERP solution with capabilities that are designed specifically for the distribution industry and its subsegments. Infor ERP cloud software is securely hosted through AWS, allowing distributors to quickly scale, providing an exceptional user experience and powerful analytics in a multi-company, multi-country, and multi-site environment, the company says.

## Insight Flooring Technologies LLC

QuoteHero is an app that allows users to measure rooms, estimate jobs and close sales on the spot, the company says. QH, created by flooring professionals, is a white-label application that flooring businesses can customize for their needs by adding a logo, line items, prices and more.

[quoteheroapp.com](http://quoteheroapp.com)

## Measure Square Corp.

The MeasureSquare iPad app lets users measure and estimate accurately and efficiently. It integrates with Bluetooth laser meters and allows estimators to create a takeoff; create and assign products; generate worksheets and estimates with flooring products, labor add-ons, cut sheets and seam diagrams; and send off a professional quote on the spot.

## Lignomat USA Ltd.

Handheld moisture meters and thermo-hygrometers give single measurements, while the MC Tracker data logger can record three measuring points for wood floors or subfloors and one ambient relative humidity reading every minute, every hour or once a day. An alarm can be set to warn the user when the air gets too dry or too moist to avoid damage to the hardwood floor. It is an ideal tool to keep track of gymnasium floors, the company says.

[lignomat.com](http://lignomat.com)

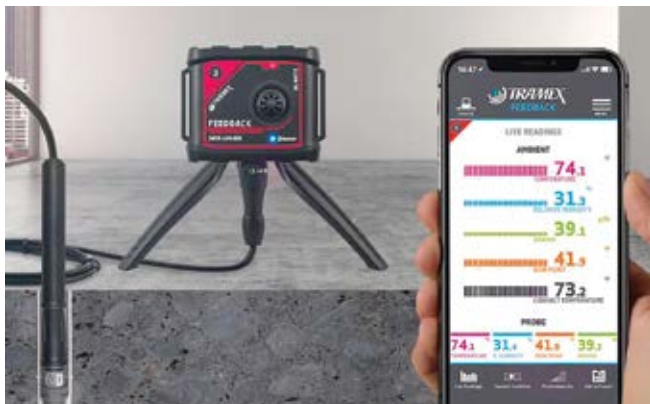

## QPro Software

QPro POS+ is a point of sale flooring software designed for hardwood flooring dealers, the company says. The software's "Kits" feature pre-populates line items to ensure nothing is forgotten.  
[qprosoftware.com](http://qprosoftware.com)

## SmartPlank

SmartPlank features technology embedded into flooring that allows the homeowner to monitor the floor with the use of an app on a smart device. SmartPlank can generate reports that can be viewed to make changes to the environment that is impacting the flooring.

## Tramex Meters

The Tramex Feedback Datalogger and App perform ASTM F2170 and log up to 100,000 data point entries of relative humidity, temperature, dew point and grains per pound. The app allows the user to visualize live and logged readings and create and export spreadsheets, charts and reports, the company says.
