USED EQUIPMENT, ETC.

Saving money, whether starting a new business or expanding your operations, is vital to your success. That starts with buying wisely, so consider investing in pre-owned, dented or new-warranty expired equipment and décor.

American Energy has a large, ever-changing selection of this equipment that can provide significant savings for your operations. To take the risk out of used equipment, AERE's team of mechanics carefully survey, repair (factory approved parts only), test and clean all items. And, we provide our own AERE Local Warranty [\[click to read terms\]](#) of at least 90-days, with some of our warranties going up to 1-year.

Used Equipment – AERE carefully selects used equipment pieces based on the quality of the manufacturers and the value each piece can bring to your business. All Used Equipment comes with our 90-day, AERE Local Warranty [\[click to read terms\]](#).

Scratch & Dent – All of our scratch-n-dent items have suffered some cosmetic damage yet continue to operate with the same quality as a perfectly new piece. Our scratch-n-dent items come with a 1-year AERE Local Warranty [\[click to read terms\]](#).

New, Warranty-Expired – These pieces of equipment are new but no longer have the original manufacturer's warranty usually because they have been in our inventory too long. We provide our 1-year AERE Local Warranty [\[click to read terms\]](#).

Because these items are unique – no two used or scratch-n-dent items are same – we highly encourage you to visit our showroom and personally “kick the tires” on all our used equipment pieces. All items are sold first come, first serve and are available for pickup or delivery within the DC Metro Area (delivery and installation quotes available upon request).
