5-2. DIP Switch Setting

There are two serial DIP switches which are set on the side of LX7-A(as 5-2 FIG.01). According to different currencies which are used by users, DIP switch settings could be varied to fit users' needs. There is also a serial DIP switch on the base of the unit for inside interface settings (as 5-2 FIG.02).

Please refer to "LX7-A DIP Switch Setting Guide" in the package for more details.

5-3. Software Download and Upgrade

To download and upgrade the software to LX7-A, the programmer (FP-004) is needed. Please contact ICT to purchase FP-004 and refer to FP-004 user guide for software download and upgrade information.

Please turn on Bill Acceptor after connecting.

6. Maintenance

To make sure the bill acceptor always works smoothly, please clean the internal parts every two weeks to every two months.

To clean the internal parts:

1. Press the buttons on the sides of bill path and pull the unit out.

2. Use a soft, dry cloth or towel to clean the bill path and sensors.

	Maintenance Notice	
	<i>(Any improper maintenance will invalidate the warranty.)</i>
