Introducing

SPECTRA

by PTI

Utilizing the power of ultra-bright LED's, the Spectra captures your customer's attention from the moment they enter the room. The multi-colored, bright LED's give operators the ability to customize the look of the bezel to match their machine color, a specific holiday or any other event. Spectra gives you the flexibility to show the world your true colors.

Design - Venting holes at the bottom of the bezel allow for dirt and debris to pass through the acceptor, limiting the amount that ends up inside. This means less down time and more time spent accepting customer payments.

Reliability - built on the same platform as the time tested Apex line of acceptors, Spectra delivers on the tried and true reliability that you expect from PTI products.

Under the Hood

- ✓ Customizable LED patterns and colors
- ✓ Simple DIP Switch and PC Configuration
- ✓ Dual-stage optical anti-stringing
- ✓ Easy to update
- ✓ High security against counterfeits
- ✓ Simple on-board diagnostics
- ✓ Accepts bills up to 72mm wide
- ✓ Automatic self-calibration
