MARK TWAIN ELEMENTARY SCHOOL
IS LOCATED IN MARK TWAIN VILLAGE,
HEIDELBERG GERMANY
WE HAVE 290 STUDENTS RANGING FROM
KINDERGARTEN TO FIFTH GRADE

Principal
Ms. Erika Roman

Dear Students, Parents, Teachers, and Staff,
On behalf of Mark Twain Elementary School I want to thank the PTA for organizing this wonderful yearbook. It was a tremendous task to take and collect photographs throughout the school year. I hope that as you page through the yearbook and view the pictures, you will smile and remember all the students, adults, and special events, which took place at our school.

MTES is a school where students' kindness, respect, hard work, and caring about one another is reinforced daily. High student achievement is fostered throughout the school by the teachers and staff. Parents help reinforce these expectations at home. We are very proud of the Mark Twain girls and boys.

Have fun looking at this yearbook! I hope that in years to come, you will always fondly remember your Mark Twain Elementary School days.

UNDER THE MICROSCOPE

Chinese Poised to Take Giant Leap for Mankind

After the successful launch of its fourth unmanned space capsule, China prepares to launch its first person into space. The Chinese Taikonaut would join the ranks of U.S. Astronauts and Russian Cosmonauts.

RNA Has its Day

The huge, newly discovered role of ribonucleic acid (RNA) in determining genetics led to its being named the number one Scientific Breakthrough of the Year by *Science* magazine.

Food for Thought

New guidelines were issued to animal drug makers by the Food and Drug Administration addressing concerns that animal antibiotics are being passed to people through food. Scientists fear that through the overuse of antibiotics in animals, bacteria harmful to people could result in humans developing immunity to treatment.

If You're Like Me...

A federal bill banning all forms of human cloning, including efforts used for promising stem cell research, was passed in the House but defeated by Democrats in the Senate.

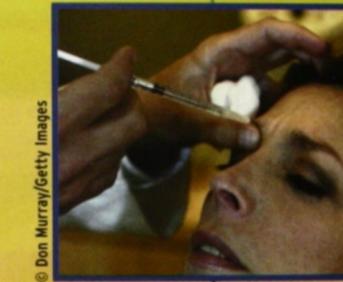

Chipping In

VeriChip, a microchip containing personal identification information, is injected under the skin. Virtually undetectable, the chip may be used for financial and transportation security, building access, as well as military and government security purposes.

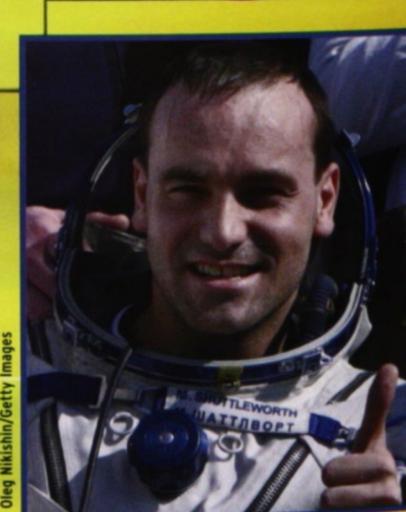

A New Wrinkle

BOTOX®, a purified form of the toxin that causes botulism, was approved by the Food and Drug Administration as a cosmetic. When injected, BOTOX temporarily reduces wrinkles in the face by paralyzing muscles in the forehead and around the eyes.

Scram Jet

A revolutionary new jet plane flew above the South Australian Desert at seven times the speed of sound... without using a drop of jet fuel! Powered by oxygen that it scoops out of the air, the HyShot scramjet could some day fly from Tokyo to New York City in just two hours!

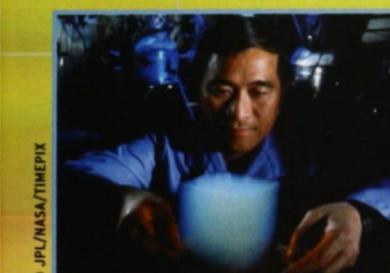

Another International Space Station Visitor

South African millionaire Mark Shuttleworth became the world's second-paying space passenger when the Russian Soyuz TM-33 spacecraft landed May 5 near the Kazakh town of Arkalyk.

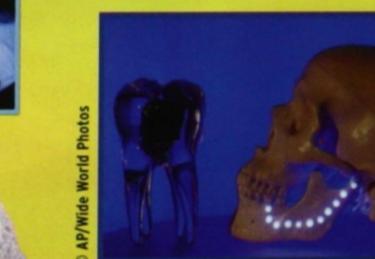

Dinosaurs from Space?!

Iridium, a mineral plentiful in asteroids, was recently discovered in sediments that are 200 million years old. That's just when the dinosaurs started to evolve rapidly and began to dominate the planet. It makes you wonder if dinosaurs were *really* from around here.

A Real Lightweight

Used by NASA to trap tiny airborne particles in space, Aerogel (which looks like frozen smoke) has been certified as the lightest solid in the world.

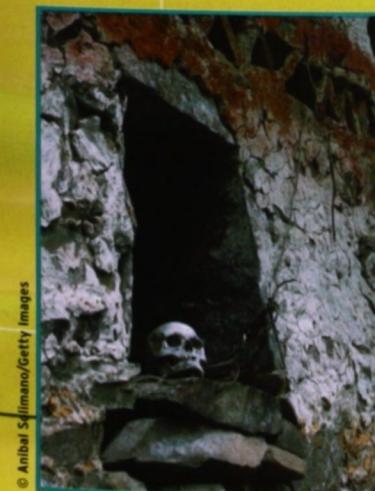

My Ears are Ringing

Two British researchers have developed a prototype "phone tooth" that, when implanted into a molar, translates phone messages into vibrations. These vibrations travel from your tooth to your inner ear where only you can hear them.

You Don't Look a Day over 5 Million

Displaying ape-like features, an approximately 6 million-year-old fossil found in Africa is now believed to be the oldest human ancestor. The previous record holder, "Lucy," was a mere 3.2 million years old.
