HELLO!

With a college degree in Interior Architecture, I realized after about 8 years that drawing black and white floor plans was just plain boring! A new job let me get my feet wet in the marketing/graphics industry and I fell in love. So I went back to The Illinois Institute of Art for graphic & surface design and decided to go solo shortly after.

My designs are clean and fresh with a fun, playful twist. I seek inspiration from the everyday and love to draw and paint. I am passionate about creating collections of patterns by combining beautiful watercolor florals with unique, hand painted coordinates in modern color palettes.

I specialize in designing surface patterns to license out to the home decor, textiles, housewares, stationery, paper products and gift industries. Hope you enjoy!

Beth
