About the Artist

HI! I'M LIZZIE CLARK —

a former museum professional who worked with industrial engineers before finding my creative side as a self-taught artist and graphic designer. My search for ways to make repeating patterns on paper, for collage art, led me to discover the fun and fabulous world of surface design. I favor contemporary and modern styles—using primarily floral and organic themes—with hints of Scandinavian and Japanese influence.

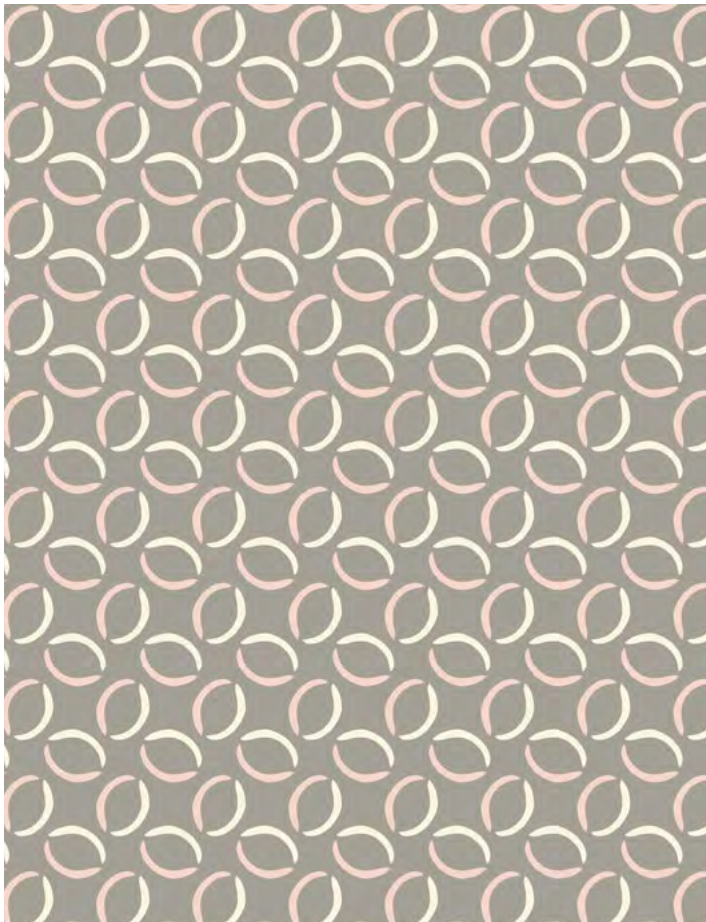

I use a palette that is sophisticated, calming and relies on a lot of grey, when I can squeeze it in! It's fun for me to bring art to life, and beauty to the function of everyday tasks. My art can be found on many everyday items. I live in State College, PA with my husband, a stained-glass artist.
