ZEBRAS

ZEBRAS

Collection

Welcome to my bright and attractive Zebras Collection!
It's full of different patterns: some of which are light and abstract ones,
while the others picture zebras frolicking in sunny meadows
among fragrant plants and flowers.
Zebras are horses that play the piano!

This collection includes six patterns in 7 different colorways.
Bright and pure colors are what make these patterns so eye-catching!
A variety of details invites you to look at it more and more.
All the elements are color balanced and matched to create
a flowing rhythm. Use these ready-made patterns
for any project of yours!

This collection was created to mix and match any designs easily.
United in style and colors, they will give your product a wide variety of
color combinations and textures.

There are the main patterns, with many bigger and smaller elements,
like zebras and flowers on a finely textured background,
and additional patterns with abstract floral motifs.

These designs are so versatile, you can use the patterns for interior design,
decor, home textile, wallpapers, ceramic, tableware,
and I can't even begin to tell you how great they look in fashion design!

All the patterns are created seamlessly in vector format,
which allows you to easily edit, change colors or even move the motifs
around according to your needs and vision.
