<p><b>Description:</b> The Occupant Classification System (OCS) is designed to classify the size and weight of the front seat passenger and, under certain conditions, automatically turn OFF the passenger air bag. The OCS system is designed to only deploy the front passenger airbag when the front passenger seat is occupied by an adult. In the affected vehicles, the OCS software may incorrectly classify the passenger seat as empty when it is occupied by an adult. If the OCS does not detect an adult occupant in the passenger seat, the passenger airbag would be deactivated.</p> <p>Failure of the passenger airbag to deploy during a crash (where deployment is warranted) could increase the risk of injury to the passenger.</p> <p><b>Remedy:</b> The OCS software will be reprogrammed to reduce the potential for classifying the seat as empty. This reprogram will be offered at no charge to the customer and should take less than an hour to complete. Your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.</p>

**Description:** Subject vehicles may be equipped with an improper On-board Diagnostics (OBD) calibration. If this improper calibration is not repaired, it may not detect a rear O2 sensor short which could cause exhaust gas emissions to exceed regulatory standards.

**Remedy:** To correct this condition, Nissan is conducting an Emission Recall Campaign to repair vehicles by reprogramming the Engine Control Module with updated OBD software.

Nissan North America Inc.

**Manufacturer Safety recall issued**

- NHTSA #20V-315
- Recall #R21A6
- ALTIMA HOOD LATCH NTB21-055
- Status: Remedy Available

Locate an authorized [Nissan dealer](#) near you to obtain more information about this recall

- [Learn more about this recall](#)

**Description:** If a vehicle is driven with the primary hood latch disengaged, (and the hood partially opened), the secondary hood latch may become contaminated with dirt or corrosion. If the secondary hood latch is not properly inspected and maintained, such dirt or corrosion could then prevent the secondary hood latch from engaging properly.

If your vehicle is driven with the primary hood latch disengaged (and the hood partially opened), the secondary hood latch on your vehicle may become contaminated with dirt or corrosion. Such dirt or corrosion could then prevent the secondary hood latch from engaging properly. If the primary hood latch is later inadvertently released (such as when refueling the vehicle) and the secondary hood latch, after having been opened, remains stuck in the open position, the hood may open without warning while driving and could obscure the driver's vision, increasing the risk of a crash.

**Remedy:** A remedy is now available. Dealers will inspect the latch for proper operation, and clean and lube as needed, or replace the secondary latch if it is not fully functional, at no cost to the owner. In addition, dealers will now install a new hood release lever spring and affix an under-hood latch-maintenance warning label to any vehicles affected by this voluntary safety recall campaign. An Owner's Manual addendum card with instructions on how to lubricate and maintain the secondary hood latch will also be mailed together with the customer notification. The repair should take less than one (1) hour to complete. The dealer may require the vehicle for a longer period of time based upon the dealer's work schedule.

## Glossary

**First Owner**

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

**Manufacturer Recall**

Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

**New Owner Reported**

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

**Ownership History**

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

**Title Issued**

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
