

# Installation Tools

**Saw guides** guide your saw blade straight through tube and pipe, creating a square, flat cut, which leads to less weld preparation.

**Cutting blades** are made from M35 high speed steel, and testing shows that they last longer than other manufacturer's blades.

**PS-8 blade lubricant** extends the life of your blades. It is safe to use on sanitary process piping, and is also water-soluble. MSDS sheets are available.

**Hose and Tube Cutter** cuts rubber, plastic, Kevlar®, and many other types of flexible tubing. Its V-block ensures a straight, clean cut every time.

Bringing  
convenience and  
cost savings to  
your installation  
process

## Dimensions

### Saw Guides

For OD Tube Sizes

SIZE	ITEM
1/2	SG05T
3/4	SG075T
1	SG10T
1 1/2	SG15T
2	SG20T
2 1/2	SG25T
3	SG30T
4	SG40T

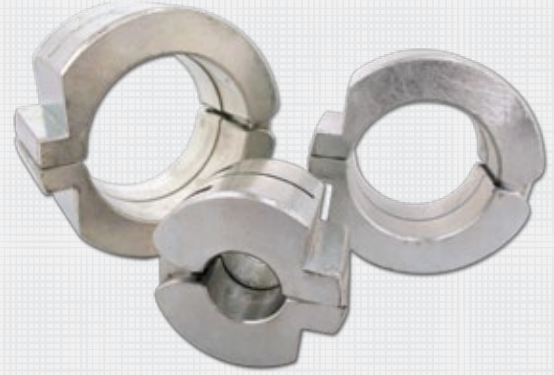

Sizes shown in inches.

### Saw Guides

For Nominal Pipe Diameters

SIZE	ITEM
1/2	SG05P
3/4	SG075P
1	SG10P
1 1/2	SG15P
2	SG20P
2 1/2	SG25P
3	SG30P
4	SG40P

Sizes shown in inches.

### Cutting Blades

PIPE WALL THICKNESS	ITEM
0.040 - 0.083	CSI035
0.083 - 0.250	CSI048
0.040 - 0.125	CSI072*
Saw blade lube	GF-PS8

Sizes shown in inches.

\*CSI072 allows for cutting smaller tube.

### Hose and Tube Cutter

DESCRIPTION	ITEM
Chrome finish	HTC-C-CHRM
Black oxide finish	HTC-C-BLOX
Replacement blades	HTC-B-10
Belt holster	HTC-H-BC

For a new cutting surface, remove the blade screws and rotate to a new edge.

Suitable for 1/4" to 1" diameter tubing.

Replacement blades are available.
