

DEATH BY DESIGN FL - ELECTRONIC PRESS KIT

BAND BIO (SHORT)

Death by Design FL is a brutal technical death metal project forged in Daytona Beach, FL. Fusing high-speed aggression with cinematic storytelling, their debut concept album *Metal Multiverse* tears through Marvel-inspired mythology with precision, fury, and purpose.

BAND BIO (LONG)

Born from the chaotic pulse of Daytona Beach, Death by Design FL is a technical death metal force that blends blistering intensity with narrative depth. Created and fronted by Casey Sicher-Ford, this project is more than a band—it's a multiversal war machine of riff-laced storytelling and relentless sonic evolution.

Their debut album, *Metal Multiverse*, is a full-concept record that channels the mythos of Marvel's most iconic figures—from Thor and Iron Man to Rocket Raccoon and Captain Marvel—into a brutal, precision-engineered metal assault. Each track is a tribute and a transformation, turning cinematic legends into distorted, high-speed compositions steeped in melodic darkness and apocalyptic flair.

With masterfully layered instrumentation, atmospheric effects, and a blend of modern and old-school death metal technique, Death by Design FL offers something rare: a concept-driven experience built for both the mosh pit and the mind. It's heavy, it's heroic, and it's hellbent.

Releasing independently on July 4th, 2025 — and available for pre-order June 6 — *Metal Multiverse* is not just an album. It's a declaration.

ALBUM DETAILS

Album: *Metal Multiverse*

Release Date: July 4, 2025

Pre-Order: June 6, 2025
