Millennium Cloud-Hosted single door access control

The Millennium single-door Cloud-Hosted option provides cloud access control for small businesses, apartments, single rooms, shops and sites with single entry security requirements. Enjoy the full featured access to our world class Millennium Ultra access control system without the need for dedicated access control servers, software installations and ongoing maintenance or backups. The Cloud-hosted Access Control Solution for single door sites gives you the advantage of a comprehensive access control system for the smallest of sites and is expandable to fit more doors as the site grows.

Easily Operated

- Simple and friendly interface makes it easy to operate with no training required
- No on-premise server maintenance needed
- System is automatically backed up and always up to date

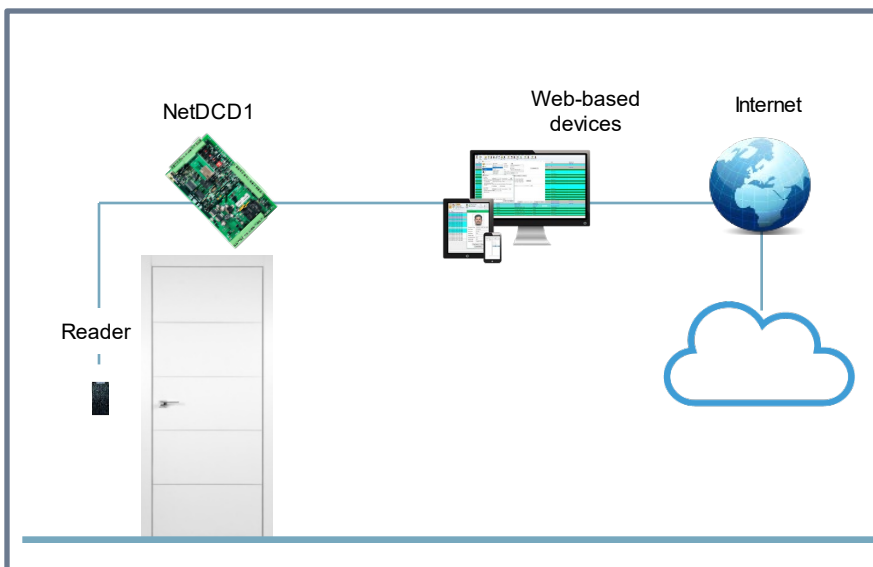

Lower costs

- Only pay for the system capacity that you need and easily expand
- Subscription model eliminates high initial capital outlay and upgrade costs

Easy Upgrade

- The one door cloud-hosted system is easily expandable to the Millennium cloud-hosted standard package for multiple doors
