

MILLENNIUM TELLUS

Pre-Engineered Access Control so easy, anyone could install it

A Pre-Engineered Access Control solution designed for fast and easy installation without compromising features, capabilities or reliability. Tellus is targeted at small to medium sized access control installations where affordability and installation efficiency is critical. The Tellus kit comes preloaded with a full-featured appliance reducing on-site labor and installation requirements while eliminating the need for software installation.

Tellus is also unique in that it requires little training for installation. Millennium offers free online installation and maintenance training for dealers. Free Tellus training is available for licensed and unlicensed dealers alike.

Typical Tellus system topology

Turnkey Solution

1-4 door pre-assembled units with built-in power supply and preloaded appliance

Eliminates the need for complex software installation

Flexible System

System can be expanded to 1000's of readers via a quick license update.

Can be converted to a cloud-hosted solution very easily

Easy maintenance

Free online training for installation and system maintenance

Pre-installed appliance eliminates the need for a computer system, simplifying equipment management
