Update Version 3.3.0 Release Notes

November 29, 2018

Contents:

1. New Features and Enhancements
2. Software Bugs addressed

1. New Features and Enhancements

- A Battery status has been added to the “Allegion locks status” page. An operator can now check the current battery status and issue a replacement if necessary.

2. Software Bugs Addressed

- Fixed a bug with the time periods; Actively used time periods were able to be deleted from the system. Now a time period must not be assigned to any device before it can be deleted, avoiding configuration issues.
