

Millennium Ultra

Update Version 2.6.0 Release Notes

March 29, 2018

---

Contents:

1. New Features and Enhancements
2. Software Bugs addressed

1. New Features and Enhancements

- New Muster Track reports “Punch In/Out” and “Inactive Users” added to Ultra. This functionality allows to operators calculate time for users attendance in the building/room, filter cards which were not used for defined period of time
- Operator rights control added for badging layout page. Now administrator can restrict operator access to the background editing page
- Automated cardholders import/export functionality added. Now Ultra software can automatically update add/delete/update cardholders information, provided by third party applications in text file format

2. Software Bugs Addressed

- Ultra software with ASSA Abloy locks integration minor fixes. “Key override” event processing added
- Shunt/Unshunt command fixed for DCD/EDCD boards
- Operator history report functionality improved. Audit events added to this report
