

Millennium Ultra

Update Version 2.0.0 Release Notes

August 31, 2017

---

Contents:

1. New Features and Enhancements
2. Software Bugs addressed

1. New Features and Enhancements

- Converged Ultra and Ultra Lite clients to simplify access for sites or users with multiple and mixed deployments
- Enhanced the historical archive search algorithm to speed searches and report generation.
- To Web client UI added possibility to copy Access Levels
- Salto integration UI optimization. Now operator can start Salto controller download process from the Site page
- Implemented services and modules necessary for March Networks video integration as well as other planned future video and alarm integrations.

2. Software Bugs Addressed

- Added warning when Ultra/Ultra Light client connects to different Ultra server (not the server from which the client was downloaded). In this case the client auto update will not be processed
- Operators Level page minor bug fixed
- Minor bugs fixes and UI improvements
