

Millennium Ultra

Update Version 2.1.0 Release Notes

September 28, 2017

Contents:

1. New Features and Enhancements
2. Software Bugs addressed

1. New Features and Enhancements

- Added possibility to update EDCD boards firmware for all doors on the site with one operator command
- March Networks CCTV integration added. Now Ultra software operators have a possibility to see a live video from connected cameras, record and play archived video connected to system alarms
- DMP integration added. Now operators can arm/disarm DMP board areas and bypass/reset zones from Ultra client or configure the card swipe to arm/disarm areas. All events from DMP boards can be visible in Ultra Event/Alarm Monitor
- Added possibility to place CCTV cameras to Floor map and run Live video viewer for selected cameras
- Added possibility to place Salto doors to Floor map and send operator commands to selected Salto doors

2. Software Bugs Addressed

- “Can’t create Access Level in Web client if the site doesn’t have tenant license” bug fixed for Ultra/Ultra Light software
- Minor bugs fixes and UI improvements
