

Millennium Ultra

---

Update Version 2.9.0 Release Notes

June 28, 2018

Contents:

1. New Features and Enhancements
2. Software Bugs addressed

1. New Features and Enhancements

- Alarm External Command page added the System Administration menu tab. This page allows the assigning more than one hot command to an Ultra alarm.

2. Software Bugs Addressed

- Fixed problems with the Hot Command list. In some situations the list didn't include all Hot command items
- Fixed backup functionality for Ultra installation with Postgres SQL
- Fixed bug with cardholder events from ECU (elevator board)
