

FINISH DEFENSE

DESIGNED TO PERFORM

BEAUTY. PROTECTION. PEACE OF MIND.

Whether you choose a solid panel or decorative glass, Finish Defense has a style that will bring exceptional beauty and consistency to your doorstep.

The Finish Defense door system offers top-tier “rot-free” protection from elements that can damage other entry systems. When you choose an all-composite PVC system, you’re investing in a high-performance door and components that provide homeowners with long-lasting peace of mind. This durable, reliable system is built to perform and stand the test of time.

2 Panel Fiberglass in Sterling Grey

WHAT MAKES IT STAND OUT

PROFESSIONAL FACTORY FINISH

Dyke Industries' expertly engineered 4-layer paint system delivers a stunning, made-to-last finish for your door.

WATERPROOF COMPOSITE FRAME SYSTEM

Rot-resistant for easy maintenance and will hold up against the toughest of elements.

SMOOTH OR TEXTURED FIBERGLASS DOOR

Will not warp, rot, dent or rust. Provides superior protection and durability.

10 YEAR LIMITED LIFETIME WARRANTY

Our industry-leading warranty provides unparalleled protection and peace of mind.

PREMIUM APPLICATION

Foam Fill

- Electronically filled and monitored to ensure a complete & even fill within the door
- Up to 6 times more foam insulation than found in other doors
- Sound proofing to muffle noises
- Durability increases resistance to rot, warp and weather
- Increases energy efficiency

Factory Applied Base Coat

- Creates smooth base for paint coat
- Balances substrates for color consistency
- Oven Baked-On for increased performance

Factory Applied Top Coat

- Specialized formula creates a powerful bond with the paint, allowing it to outperform other door finishes
- Weather-resistant finish
- No additional painting or top-coating needed to maintain the full Finish Defense warranty

Factory Applied Primer Coat

- High quality primer designed specifically for fiberglass doors
- Increases paint adhesion
- Oven Baked-On for better performance

Factory Applied Paint Coat

- Industry-premium paint and paint application process
- Paint is bonded to the door at the molecular level as seen in premium automotive finishes
- Oven Baked-On for strength, durability and premium quality

Dyke Industries offers a variety of finishing colors from our FinishDefense coating system. Our unique 4-step process creates a long-lasting and beautiful finish for your door.
