■ Condor Nest Strategy Playbook

Objective

- Capture **time decay (theta)** and **volatility edge** by starting with flexible structures (Time Spreads).
- Transition into **low-risk, high-reward iron condors** when the market provides the opportunity.
- Continuously **take risk off, free capital, and redeploy** into new trades.

■ Condor Nest Strategy Playbook

- The iron condor looks attractive on paper. High win rate. Defined risk. Collect premium and wait.
- Here's the problem nobody talks about until it happens to them.
- You win 90% of the time. Feels great. Then that 10% loss shows up and wipes out months of accumulated profits. Sometimes more. The reward-to-risk ratio on traditional iron condors is, frankly, horrible. And the whole time you're in the trade your capital is locked up in margin while you hope the market cooperates.
- Time spreads (calendars, double calendars, diagonals) have their own trap: you're exposed to volatility drops and market moves, even though they can be fast theta achievers .That's why very few traders truly know how to trade time spreads—even though they can be extremely effective when handled correctly.

-  Benefits (and why they're valid)

The Condor Nest strategy doesn't start as an iron condor. That's the key difference.

- Start with time decay → The Time Spreads accumulates theta from day one.
- The position is flexible. You can adjust it. You're not locked into hoping the market stays in your range.
- Lock into low-risk, high-reward → Iron condor conversion caps the downside and crystallizes potential.
- High encounter probability → By centering around ATM with multiple legs, you've got lots of "touch zones."

Benefits (Visual)

Initial time spread position with defined risk on the wings. Notice the curved P/L profile – but you have exposure if the market moves sharply in either direction.

■ Benefits (and why they're valid)

- Spread as many as possible → Diversifying across expirations and strikes reduces regime dependence.
- Legging into new trades → Continuous cycle; as one is locked and risk taken off, you redeploy margin.
- Risk off + capital in hand → The core edge: never staying “fully exposed,” always recycling risk into new high-encounter trades.
- Think about traditional options spreads. You put up \$2,000 or \$3,000 in margin. That capital is tied up until the trade closes. You're sitting there waiting, watching, hoping things work out while your money does nothing else.
- With the Condor Nest approach, something different happens. You might use \$1,000 to \$3,000 to open your initial time spread position. But after you adjust and convert the trade into a risk-free iron condor, the margin requirement drops to near zero. Sometimes actually zero.

■ Benefits (and why they're valid)

- Original capital is now free. You can use it to open another position. The same \$2,000 that funded your first trade can now fund a second trade while the first one is still working. Do this a few times and you're running multiple positions with capital you would have had locked up in a single traditional iron condor.
- This is how professional traders think about capital efficiency. Your money should be working, not waiting.

■ ✓ Benefits (Visual)

After adjustment – notice the flat P/L line across the entire range. Risk is eliminated while profit locked and potential remains. Your margin requirement drops to zero.

■ Trade Setup – Entry

- DTE Selection:
 - Near-term short options (1–30 days) for faster decay.
 - **A) CN-0 Front Week (7–4 DTE)***
 - **B) CN-7 Next Week (14-11DTE)***
 - **C) CN-14 Two Week (21-18DTE)***
- Long options 2–3 cycles out for stability.
- Strike Choice:
 - Start ATM or slightly OTM.

■ Locking into Iron Condor (The “Nest”)

- **Trigger Conditions** (Complete Guide* A-to-Z):
- Price moves near your short strike.
- Theta gain achieved and risk/reward tilted.
- **Benefit:**
- Low additional margin.
- Takes open risk off the table.

*Flexibility is one of the greatest strengths of this methodology. To help you get started, we **provided** you with a complete step-by-step guide—including what to do, how to adjust, and when to lock—for three recommended starting strategies, each with a different level of participation.

■ Capital Recycling

- Once locked condors are in place:
- Risk is removed capital requirement drops.
- Free margin redeployed into new position.
- Cycle repeats → always farming new nests.

▪ Key Advantages

-  Theta-positive from day one.
-  Flexibility to adjust before committing.
-  Low-risk, high-reward once locked.
-  Scalable & repeatable with capital recycling.

What's Included in the Full Workshop

- **✓ Complete Condor Nest Playbook** — Step-by-step process for applying, adjusting, and managing trades
- **✓ Excel Trade Manager** — Custom-built model with stop-loss controls, adjustment logic, order tracking, and visual levels
- **✓ Full Live Session Walkthroughs** — Watch real examples and learn how to execute with confidence
- **✓ Tools and Extra Educational Topics.**
- **✓ Discord Private Community** — Connect with fellow traders
- **✓ Q&A Sessions** — for each Class session

RESET QUIZ HELP 1

■ What's Included in the Full Workshop

■ CLASS 1

- The workshop – What's included.
- Tour of the subscriber page.
- Introduction to the Main Concepts.
- Few examples.
- Using TOS (Think or swim) .
- First look at trade set up (live on TOS).

- • All sessions recorded for replay
- Workshop-Course use LMS (**Learning Management System**).

■ What's Included in the Full Workshop

■ CLASS 2

- The workshop –Recap Class #1.
- The Pendulum Analogy (for Modeling in Options).
- Introduction to Dissecting trades.
- Iron Condors.
- Few examples. Using TOS (Think or swim) .
- Basic trade set up (live on TOS).
- Q&A.

- All sessions recorded for replay
- Workshop-Course use LMS (Learning Management System).

■ What's Included in the Full Workshop

■ CLASS 3

- The workshop –Recap Class #2.
- Preset Check before every trade
- Fast Trade set up (Recorded live on TOS).
Double Calendars to Iron Condors.
- Few examples. (From a student) .
- Q&A.

- All sessions recorded for replay
- Workshop-Course use LMS ([Learning Management System](#)).

■ What's Included in the Full Workshop

■ CLASS 4

- The workshop –Recap Class #3.
- Preset Check before every trade
- Presenting 3 Starting Trade set up (TOS).
- Few other extra examples. (Live on TOS) .
- Using the Spreadsheets (TOS/IBKR).
- Introducing the CN-Private channel (Discord).
- Q&A.

- All sessions recorded for replay
- Workshop-Course use LMS ([Learning Management System](#)).

-  What's Included in the Full Workshop

-  Condor Nest Setups

- **A) CN-0 Front Week (7-4 DTE)***
- **B) CN-7 Next Week (14-11DTE)***
- **C) CN-14 Two Week (21-18DTE)***
- *Open on Friday or at the next Monday session.

-  What's Included in the Full Workshop

- **But wait... do I need to study all this to start trading this method? Absolutely not.**
- The order flow and core method are very simple to start using right away. And if you want to truly make it your own over time, the full workshop gives you all the building blocks needed to trade options professionally—and apply this knowledge to other strategies too.

■ What's Included in the Full Workshop

- This workshop was recorded about two months ago, and it's now been expanded into a full course.
- **Did I miss anything?**
Not at all. In fact, the classes have been edited and refined—so they're clearer and easier to follow.
- And once you're a member, you're never on your own: you can ask questions anytime and get support from me, the support team, and other students inside the private **Condor Nest Discord** channel.

Looking forward to some good discussions on the topic TB. This is a really powerful trading method.

As a starting point. Did anyone hatch a condor nest this week? edited

-  Condor Nest Workshop.

- Is This Right for You?

- Even if you're completely new to options, you'll be able to follow the method after completing the basics of the course—while intermediate and advanced traders can completely revolutionize the way they look at capital and options trading strategies.
- If you've ever had a single loss wipe out months of careful trading, you understand the problem this solves.
- Students are getting solid results with this approach. The structured methodology takes the guesswork out of adjustments and gives you a clear plan for every scenario.

@Carlos this is a real money trade for .the family car addition expiring next Friday.

1/28/2026 3:23 PM

I have already traded a couple of successful CNs (already paid for the course), but the recent one was the most challenging one that I wanted to share. Started it on 1/16 before the long weekend, which was a bad decision, as I know now, but I knew I would not be able to trade for most of the following Tuesday. Did the bearish conversion on 1/21 (Wednesday) after the Greenland mess and, of course, got whipsawed. Did the conversion of the second half on Monday this week and set up a new CN on Tuesday. This converted today and I closed the bearish condor to end up with a riskless CN. I hope to milk it a little more. I do not have TOS, but downloaded the trades from IB. As you can see, most of the trades executed outside of RTH. Risk graph from Optionstrat.

Open/Close Quantity F-Trade Commit/Pos. Last Price Last Chg.

Condor Nest Students Results

Condor Nest Students. Real Trades

Hello! Here's my position after 3 Nested Condors. I am NOT riskless on the upside - there's a debit of \$175. Sharing this here to solicit feedback and recommended trades/adjustments for learning purposes (edited)

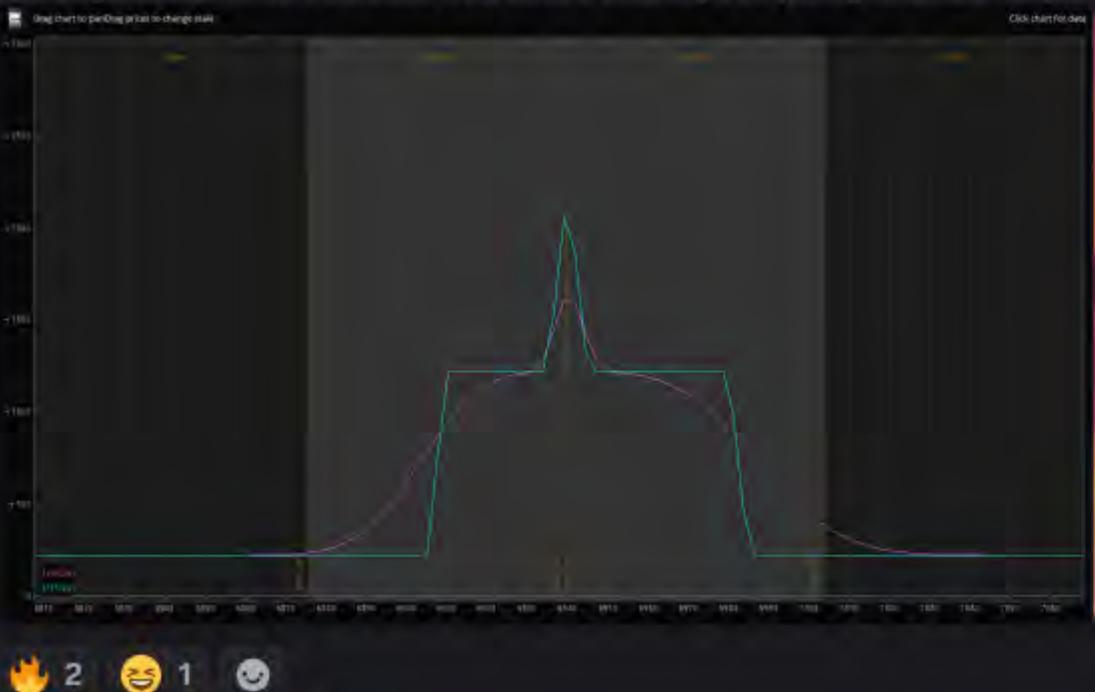

Condor Nest Students.

So this post is more for entertainment purposes than anything else. I closed my two trades today to lock in some nice profit. I had an meeting about our insurance and when I got back home, I checked TOS before shutting everything down. What you see here is a composite of my two trades and how the market ended today. 😂

■ Condor Nest Workshop

- Student Extra Benefits:
- the spreadsheets alone—sold individually—represent about \$250/year each in value. So
- you're already covering most of the cost just from the tools included.
- Future extra sessions (Extra*), Live Discussions implementing the Method.
- *(exact date and time Extra Classes to be announced).
- Priority and Special Enrollment Discount to Trade Alerts**
- Free or Special Price on new dedicated Tools when available.
- ** We are considering to offer a dedicated Trade Alert Service in the future.

- • All sessions recorded for replay
- Workshop-Course use LMS (**Learning Management System**).

-  Condor Nest Workshop Enrollment

Price: \$599
