

Virtua Health System

Virtua Memorial - Special Care Nursery

Mt Holly, NJ . 18,000 SF.

Description

FCA provided architecture, planning, and interior design services for these phased renovations to the current Mother-Baby Unit at Virtua Memorial Hospital. The project was planned as a bridge to meet the demanding needs of maternal child healthcare in the region until a new, dedicated building could be constructed.

Cosmetic upgrades included six labor and delivery rooms, 21 postpartum rooms, three recovery rooms, and 30 bassinet well-baby nurseries. Additions also included nurse stations, and staff and support spaces. Renovation of 12-bassinet special care nursery meets current perinatal guidelines: providing natural light, space for families, equipment storage and hand-wash sinks.
