## MOUNTING OPTIONS

### NC - New Construction Frame-In Tray

**Standard bar hanger (included)**

Mounting length 14 3/4" - 26".  
Extension kit can be ordered separately.

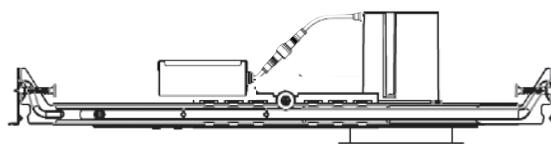

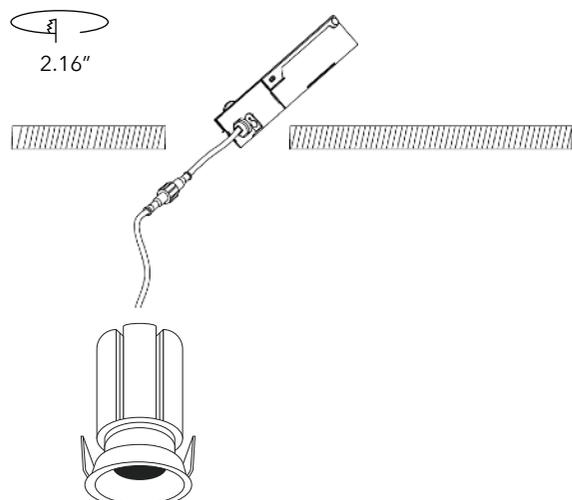

**Commercial bar hanger #1487**

Butterfly and caterpillar brackets available

### New Construction & Remodel Mounting

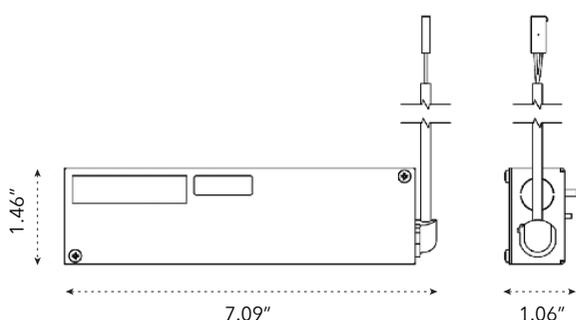

**Note:**

Small fixture housing and driver enclosure box assembly can be used for both new construction and remodel. For remodel application, no new construction tray is needed.

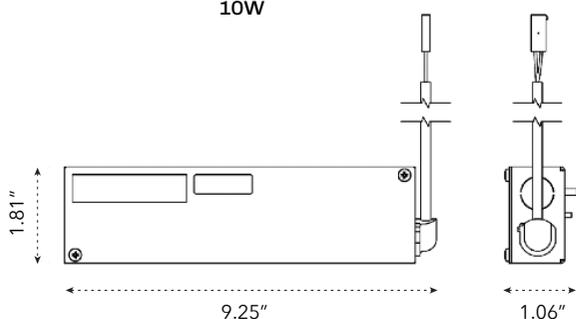

The ceiling cutout opening will be too small to fit your hand through it. So it is very important that the LED driver remains accessible by removing the lighting fixture, thus allowing you to inspect the connectors or LED driver at any time without physically damaging your ceiling or other building materials.

This mounting allows for installation from below the ceiling access and full serviceability of the LED driver and driver/junction box.

### REMOTE TEST SWITCH

The remote test switch may be mounted adjacent to the LED fixture by others.

### EMERGENCY BATTERY ACCESS

Above ceiling access is recommended for ease of service, but LED fixture sizes of 4" and larger are capable of below ceiling access. IC/ICAT/CP box and ITS option require an access panel in the ceiling (or other form of access) adjacent to the installation location of the emergency battery.

### REMOTE LOCATION

Maximum remote mounting distance of the emergency driver shall be 50 feet. Remote location wiring provided by others. Follow all local and national electric/building codes.

### WALL PLATE ACCESSORIES
