New Construction & Remodel Mounting

Note:

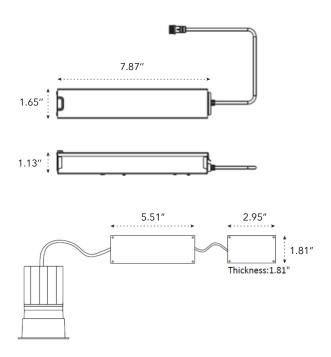

Small fixture housing and driver enclosure box assembly can be used for both new construction and remodel. For remodel application, no new construction

tray is needed.

The ceiling cutout opening will be too small to fit your hand through it. So it is very important that the LED driver remains accessible by removing the lighting fixture, thus allowing you to inspect the connectors or LED driver at any time without physically damaging your celling or other building materials.

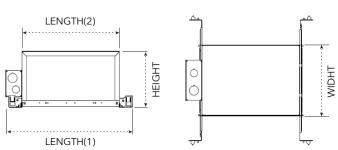

This mounting allows for installation from below the ceiling access and full serviceability of the LED driver and driver/junction box.

LED Driver Enclosure and Junction Box

2-sectional driver and wiring box will ship when the AT/CP option is selected. Also can be used for plenum space issues.
