FEATURES

- A compact architectural outdoor projector designed for high-performance steplight.
- Featuring CREE COB or XP-E/G LEDs, it delivers precise, uniform light distribution without color shift.
- Optimized thermal structure with ADC12 die-cast aluminum ensures long-term stability, maintaining >80% lumen output at 50,000 hours.
- Built with stainless steel components and 4mm tempered glass (>92% transmission).
- Multiple beam angles available, with integrated dimmable driver options.

SAFETY INSTRUCTIONS BEFORE INSTALLATION

1. Improper installation may result in injury, electric shock, or product damage. Installation must be performed by qualified personnel only.
2. Operating temperature: -20°C to +55°C. Do not install in flammable, explosive, or high-impact environments. Avoid dusty, humid, or corrosive environments.
3. Input voltage: AC 120–277V, 50/60Hz (US version). Voltage tolerance: $\pm 10\%$. Wiring design must consider load capacity, voltage drop, and power distribution.
4. Disconnect power before installation. Check all wiring connections before energizing. Ensure proper ventilation and heat dissipation. Do not install in contact with thermal insulation. Do not bend, pull, or damage cables.
5. Install the driver in a dry, well-ventilated location. Total load must not exceed driver capacity. Recommended driver capacity is at least 120% of total load. Reduce load when installed in waterproof junction boxes, if applicable.
6. Disconnect power before maintenance or servicing. Do not disassemble or modify the fixture. Maintenance must be performed by qualified personnel only.
7. In case of abnormal operation, disconnect power immediately and contact qualified service personnel.

INSTALLATION INSTRUCTIONS

1. Install sleeve flush with wall and route cable through before fixing.
2. Connect cable with sufficient slack for maintenance.
3. Insert fixture and secure with side setscrews.

STEP 1 ▶

Put the sleeve into the wall, the side should be on the same level with the wall surface. cable needs to go through the sleeve.

STEP 2 ▶

Connect the cable with the light, keep enough length for them to maintain.

STEP 3 ▶

Put the light fixture into the sleeve and fix the fixture light with sleeve by screw on two sides of the cover.
