Pathways to Supply Chain

Greetings!

We officially kicked off the Pathways Program on September 5, with our 2025-2026 Pathways Scholars attending the Pathways orientation. The Scholars have had a busy start getting acclimated to campus, classes, Pathways and other activities.

We are so excited for the 2025-2026 academic year and our Sponsor meetings. We have provided a brief overview of our 11 Scholars on the next few pages. We look forward to you meeting them in person, but in the meantime, we asked the Scholars to introduce themselves in their own words. Their introductions follow the brief overview we have provided.

Thank you to all our sponsors for your continued support of the Pathways to Supply Chain Program.

Meet Alyman!

Alyman Alfarsi

Junior

Major – Operations Mgmt.

High School – Neem bin Mas'oud

Hometown – Oman, Suhar

Hello, my name is Alyman Alfarsi, and I'm currently pursuing a Bachelor of Science in Business Administration at The Ohio State University, specializing in Operations Management with a minor in Economics. I'm deeply passionate about optimizing systems and improving processes, especially within supply chain management, a field that connects businesses, communities, and economies in powerful ways.

Growing up in Suhar, Oman, I saw how business decisions could shape entire communities. That curiosity led me to an internship with OQ RPI, where I'm training in logistics and procurement. I've gained valuable hands-on experience managing supplier relationships, coordinating inventory, and understanding how operational efficiency impacts both business success and community well-being.

Outside academics, community service has always been an important part of who I am. I've been an active member of the Ghiras Charity Team since 2015, organizing food drives and donation campaigns for families in need during Eid, Ramadan month, and the back-to-school season. I also collaborated with classmates at Ali bin Abi Talib School to build a hydroponics project, which promoted sustainable agriculture and teamwork. These experiences shaped my values, cooperation, service, and responsibility, which I now bring to my life as a student at Ohio State. I chose to attend The Ohio State University because of its exceptional Fisher College of Business, its strong global network, and its emphasis on experiential learning. Coming from Oman, I wanted to immerse myself in a diverse academic environment where I could grow both personally and professionally. Ohio State offers the perfect balance of academic challenge, real-world opportunities, and a vibrant community that prepares students to be leaders who make an impact. Looking ahead, I aspire to build a career in supply chain and operations management, helping organizations become more efficient, sustainable, and resilient. I'm especially inspired by companies like Unilever for their ethical sourcing and sustainability initiatives, and Apple for their mastery of operational excellence. Through my education at Ohio State and the mentorship I will gain from this program, I hope to follow in their footsteps balancing innovation with social responsibility. I'm honored to be part of this program and excited to learn from our sponsors, corporate partners, university mentors, and my peers. Thank you for this opportunity to grow, contribute, and represent The Ohio State University with pride.

Meet Adrianna!

Adrianna Barnes

Sophomore

Major(s) – Operations Mgmt.,

Minor(s) - Economics & Fashion & Retail Studies

High School – Green

Hometown – Akron, OH

My name is Adrianna Barnes from Akron, Ohio, and I'm an upcoming second-year this fall. I love going to concerts and hearing my favorite artists live, like Olivia Rodrigo, The Lumineers, and Wallows. I'm also an outdoorsy girl and have always had fun being in the sun, whether I'm hiking in Cuyahoga Fall National Park or just lying in my backyard. When I'm back on campus, there's nothing I look forward to more than spending quality time with my best friends, anything from exploring High Street to study sessions in Thompson Library. I chose Ohio State for several reasons: perfect city location, countless opportunities, and one of the top Operations Management programs in the country. Over the course of my first year in Columbus, I've had such an amazing experience. I've been an active member in the Mount Leadership Society Scholars program where my peers and I contributed to the community through various service projects while learning about leadership and creating a close circle of friends. Through the student organization, Grant Central, I've written real grant applications for the nonprofit, Friends of the Lower Olentangy Watershed, to assist in their mission of keeping the Olentangy clean and safe. While also being a member of Women in Business, Letters of Love, and just putting myself out there, Columbus and Ohio State have become a second home to me. I chose my specialization with intention. When people think of business, their first thoughts tend to go to Finance, Marketing, etc. Often, Operations gets overlooked, despite being a key part of every corporation. I want to be a key part of the process that includes discovering the most efficient methods and finding the missing pieces to the different puzzles within the supply chain and overall operations. I'm also minoring in Economics and Fashion & Retail Studies. Through my minor in Economics, I plan to keep building on the foundation that my microeconomics and macroeconomics classes gave me so that I can be more well-rounded and knowledgeable, knowing that economics goes hand-and-hand with operations. My decision to add my second minor was the most deliberate; Ohio State excels at putting its operations students on a track to go into the automotive industry, especially. However, I find myself much more engaged in the retail industry, figuring out the inputs required to create the outputs that are my favorite outfits, using strategy to predict upcoming trends so that we can figure out what products would be most profitable to produce, and strategizing how to use the supply chain to our advantage. I hope for the opportunity to explore this through future internships and have the chance to learn from retail companies to obtain a deeper understanding of this side of operations because though it's not often talked about, there is a demand for it.

Meet Lindsey!

Lindsey Garcia

Freshman

Major(s) –Logistics Management

High School – Niles North

Hometown – Columbus, OH

My name is Lindsey Garcia, and I am a first-year student at The Ohio State University, specializing in Logistics Management at the Fisher College of Business. I was born in Chicago, Illinois, and attended a suburban high school where my interest in business began when I joined DECA, a national competitive organization that strives to “prepare emerging leaders and entrepreneurs in marketing, finance, hospitality, and management”. As a first-year member, I placed 3rd in the state for my Principals of Business Administration and Management roleplay. I successfully advanced to nationals, which took place in Orlando, Florida, this past April. Regionals, state, and predominantly nationals gave me such an insightful experience into sectors of the business world. Opening my eyes to strategic thinking and real-time problem solving—central skills to the field of logistics.

At The Ohio State University, I am part of the Business Scholars Program, where we focus on learning by doing. The program holds leadership workshops, alumni engagement, and provides real-world exposure to the business world. Outside of business, I plan to join the Happy Hearts Club, which builds friendships and provides social opportunities for individuals with autism, Down syndrome, and other developmental disabilities. I held similar leadership roles throughout high school and have developed an everlasting passion for supporting others, building connections, and creating inclusive communities.

I chose The Ohio State University for its nationally ranked logistics program, high job placement rate, and unmatched resources at Fisher. Being accepted into the Business Scholars’ program ultimately finalized my decision after touring. Additionally, OSU’s opportunities for studying abroad and internships guided me to the certainty that I could grow into the best version of myself here. Might I also add that the free laundry was a significant bonus too!

What drew me most to logistics was the challenge of keeping systems running efficiently and smoothly, not just from a high-level perspective, but also at the operational team base level. I value communication and collaboration, believing deeply that they are the heartbeat of successful supply chain operations. Furthermore, I am incredibly keen to be part of the Pathways program and to formally introduce myself to all who make this opportunity possible! I acknowledge it is a privilege to possibly work and communicate with companies like JPMorgan Chase, DHL Supply Chain, Meijer, and more. I am inspired to foster growth and leadership among women entering this traditionally male-dominated field.

Long-term speaking, I desire to hold a leadership role in logistics management where I can be present, accessible, and engaged. I will strive to be the leader who listens first, directs with empathy, but overall drives for efficiency. Pathways provides the environment for a nurtured mind to grow, and I am incredibly appreciative of the opportunity to be part of this cohort.

Thank you for investing in the program, and I look forward to learning and showing you who I am, not just as a student, but as an emerging leader.

Meet Romier!

Romier Hunter-Lawrence

Freshman

Major(s) – Operations Management

High School - Jeffersonville

Hometown – Clarksville, IN

My name is Romier Hunter-Lawrence, and I'm a first-year student at The Ohio State University majoring in Operations Management on the pre-dental track. I am also a proud Morrill Scholar. I'm originally from Clarksville, Indiana, and I'm thrilled to be starting this journey at Fisher and through the Pathways to Supply Chain Program.

My interest in business, specifically operations management, grew from watching my mom build and manage her occupational therapy practice. As a Black woman and solo owner, she taught me the power of perseverance, adaptability, and strategic leadership. I saw how challenges like the COVID-19 pandemic impacted her business operations, from staffing to patient scheduling, and I was inspired by how she adjusted and continued serving her clients. That experience showed me how important efficient systems and thoughtful decision-making are behind the scenes of any successful organization. I want to develop those skills so I can someday apply them to my dental practice or even start a Dental Support Organization to support other providers.

I chose to attend The Ohio State University because I was genuinely inspired by the opportunities available both in and outside the classroom. The campus felt like a place where I could grow as a student, a leader, and a person. I'm excited about the work I'll do as a Morrill Scholar and the diverse programs offered through the Max M. Fisher College of Business. OSU stood out to me not just because of its academic strength but because of its commitment to inclusion, innovation, and student success.

In high school, I committed myself to leadership, service, and community involvement. I served as class president, chaired committees through the NexGen Leadership Program, helped raise money for children impacted by trauma, and served as Vice President of the Clarksville Youth Council, representing young voices in city planning. I also created student traditions, co-founded clubs, and supported peers in sports and student government. These experiences taught me how to lead with empathy and collaborate toward meaningful change.

At Fisher, I want to continue building community and gaining real-world business insight. Programs like Pathways will help me grow as a leader while giving me the chance to explore supply chain careers, learn from mentors, and connect with others who share my passion for operational excellence and equity in business.

Meet Marin!

Marin Jancewicz

Sophomore

Major(s) – Operations Management

High School - Fenwick

Hometown – Western Spring, IL

Hello my name is Marin Jancewicz and I am from Western Springs, Illinois, a near west suburb of Chicago. I graduated from Fenwick High School in Oak Park, Illinois and this is my second year attending The Ohio State University. When considering different colleges, I loved the idea of being in a city but also wanted to be part of a strong community, where students were supportive and excited about the school. When I visited as a senior, attended orientation and began school last fall, I knew I made the right decision. I have enjoyed exploring the city, making new friends, playing tennis and pickleball and of course attending football games.

I am a member of the Kappa Kappa Gamma sorority and work seasonally at the Crema Nut Company in Grandview Heights. Last year I was able to work on both the packaging and shipping lines, as well as assisting with online and retail orders. For a small family-owned business, the volume of products produced, shipped and sold each day was impressive.

Within the business concentrations at the Fisher School, I was drawn to the problem solving, collaborative teams, and critical thinking involved in the supply chain industry. I believe the work speaks to my strengths and my strong mathematical skills will be an asset. I envision myself working in this fast-paced environment where many systems must work efficiently and in the most effective manner.

I am looking forward to starting the Pathway to Supply Chain mentoring program and becoming much more familiar with the industry. Connecting directly with professionals, while also being mentored and learning about challenges and opportunities unique to supply chain will enhance my coursework immensely. I know associating with like minded students in the program and learning from one another's perspectives will be important. Thank you for this generous and exciting opportunity.

Meet Isaac!

Isaac Merz

Freshman

Major(s) – Operations Management

High School - Naperville Central

Hometown – Naperville, IL

My name is Isaac Merz, and I'm an incoming freshman at The Ohio State University, where I'll be studying Operations Management at the Fisher College of Business. I'm from Naperville, Illinois, and I've always had a deep passion for entrepreneurship, innovation, and building things from the ground up. That passion has driven me toward business, not only as a field of study, but as a platform for creative problem-solving and long-term impact.

Throughout high school, I immersed myself in speech and debate, where I learned to think on my feet and speak confidently. I also worked at a small business called Chez François Pouterie, where I gained firsthand experience in day-to-day operations, customer service, and what it takes to run a business. More recently, I've been interning at a liquidation store near me, where I've been learning about the wholesale business world. I've helped find wholesale buyers and improve sales, which has provided me with even more exposure to real-world business processes. Outside of academics and work, I love playing volleyball. I played all four years in high school and competed on club teams throughout that time as well. Volleyball satisfies the competitive side of my personality, and it's a sport I chose to pursue entirely on my own. Through consistent practice and self-motivation, I've grown both in skill and confidence, and it's become a meaningful outlet for personal growth and teamwork.

I decided to attend The Ohio State University because it offers exactly what I'm looking for in my college experience. Columbus is a great city, and the campus has a welcoming feel that makes me feel at home right away. The Fisher College of Business stood out to me because of its strong programs and the way faculty members genuinely care about helping students succeed. I'm excited to learn from professors who bring real-world experience into the classroom and to work alongside classmates who come from different backgrounds. One thing that really influenced my decision was Ohio State's alumni network. Every alum I spoke with was eager to share their experiences and offer guidance, which tells me a lot about the kind of community this university builds. I know these connections will be valuable as I explore different career paths and opportunities. What I'm most looking forward to is the chance to grow both personally and professionally. I want to get involved in student organizations, maybe explore some entrepreneurship programs, and really make the most of everything Ohio State has to offer. I believe this university will give me the foundation I need to succeed while pushing me to become the best version of myself. This scholarship means a great deal to me, not just financially, but because it will connect me with mentors, peers, and professionals who can help guide me to success. I'm eager to contribute to this program and to learn from everyone involved. Thank you for this opportunity. I'm honored to be part of this network.

Meet Molly!

Molly Meyer

Freshman

Major – Logistics Management

High School - Wolcott

Hometown – Wolcott, CT

Hi, my name is Molly Meyers, I am an upcoming freshman at The Ohio State University, majoring in Business Administration with a specialization in Logistics Management. I am excited to be a Buckeye, especially to being a part of the Pathways to Supply Chain program. I look forward to meeting and creating connections with mentors and professionals within this program and cannot wait to see the opportunities it provides.

My passion for business started with working at my father's small land surveying company, Meyers Associates PC. As I grew up, I witnessed the daily challenges and decisions that went along with running a business, whether that be scheduling and conversing with clients, to ensuring equipment was secured. These experiences were real-world lessons that taught me how such small details can have such a large impact on an outcome and assisted in sparking my interest in the behind-the-scenes operations that go along with running a business. As I became more involved in the family company and began working there each summer, I discovered a strong interest in the logistics behind small businesses. I found it incredibly interesting how time, resources, and information all came together to complete a job. Something as simple as checking if we had the right supplies, or meeting face-to-face with a client could make all the difference in the long run. These experiences assisted me in realizing that I enjoy problem-solving and I thrive when I am planning, organizing, and overall improving processes.

Beyond just my father's business, I've worked extremely hard to become a leader and vital community member. I have served for a year as Treasurer and for three years as President for the Wolcott Leos Club, where I've led food drives, organized volunteer efforts, and planned community events, as well as much more. I have also spent my high school career instructing elementary school students in the *FIRST* LEGO League, teaching them basic coding skills, teamwork, and problem-solving all while using STEM activities. These roles within my community have helped me to build my leadership, communication, and organization skills that I hope will serve me both at Ohio State, as well as within my future career.

The reason I chose to attend The Ohio State University is because of its highly recommended Fisher College of Business, and the incredible opportunities it offers for its students. I was drawn to this university because of its vibrant campus life, strong sense of community, and access to real-world learning like the opportunity to be a part of this program. I firmly believe that The Ohio State University is the place that will allow me to grow both personally and professionally, and I am extremely excited to start the next chapter of my life.

Once again, thank you for this incredibly opportunity, I look forward to meeting, learning, and gaining valuable insight from you all. I hope to continue my growth as a leader throughout my time in the Pathways to Supply Chain Program.

Meet Orlando!

Orlando Pan

Sophomore

Major(s) – Operations Management

High School - Qibao Dwight

Hometown – Zhejiang, China

My name is Orlando Pan, and I am currently a sophomore at The Ohio State University. Take it as my first choice is thoughtful and meaningful. What I like most about it is its vast campus and the rich variety of activities. Also, OSU with its century-old history, is a fine representation of a classic American university. Next, Fisher College of Business, as an established business school, is also well-known in the United States. The many professional options it offers provide great convenience for students like us who are unsure about what major to choose.

OSU's dedication to both history and innovation is another factor in my decision. From the well-known "O-H-I-O" chant to innovative studies in several of disciplines, the institution has a long past while maintaining an eye toward the future. I believe OSU is the ideal setting for my academic, social, and personal development since I respect both modern advancement and cultural legacy.

At the same time, one of the very important reasons why I chose this school is that everyone in the entire state of Ohio is very friendly. When I landed in Ohio for the first time by plane, I immediately felt the characteristic of people helping each other. First, they warmly welcomed you to this place. And when I attended the first orientation, I discovered that regardless of your nationality, your skin color, or your race, you were treated the same and received the same education when you came to this school. When I first entered the school, I saw the International Student Mutual Aid Organization. They gave us the guide of this school and told us how to integrate into this community. I think this is a very important factor in measuring whether a school is inclusive and it is also the reason why I firmly chose this school.

Since childhood, I have always been curious about how people make decisions, how businesses grow, and how different societies interact with each other. In high school, I was the captain of the school's football team, which taught me leadership, teamwork, and time management. At the same time, I also actively participated in the local Chinese Students and Scholars Association, helping to organize cultural activities and promoting communication among students from different backgrounds. These experiences sparked my interest in communication, management, and cross-cultural understanding. I hope to further enhance myself at OSU.

I intend to expand my horizons in the future by participating in volunteer work, internships, and student groups. In addition, I want to get more knowledge about international business processes and work for leadership positions on school. My objective is to use my degree to contribute significantly to my community and beyond, in addition to establishing a prosperous profession.

Meet Devin!

Devin Shoflick

Sophomore

Major – Operations Management

Minor – Real Estate

High School - Cherry Creek

Hometown – Greenwood Village, CO

Business has always been the field that captured my interest, inspired my ambition, and shaped the way I see the world. I have long believed that understanding business; how it runs our economy, drives innovation, and impacts lives, is one of the most important things a person can know. From a young age, I knew I wanted to pursue business in college, but I wasn't sure which subject within the field I would enjoy most. That changed during high school when I took a job at Jing Denver, a restaurant where I spent two years learning far more than I ever expected. What started as a job quickly became a passion. As I worked my way up to an expo position, I gained insight into the inner workings of the restaurant's operations and minor managerial functions. I thrived in the fast-paced, hands-on environment, where organization, efficiency, and leadership mattered. I realized I was drawn to the operational side of business. This discovery led me to major in Operations Management at The Ohio State University, where I also pursue a minor in Real Estate to expand my long-term career options.

My passion for operations extends beyond the classroom. I am a member of the Business Operations Management Society and AEPi sorority, where I plan to run for Vice President of Operations. These experiences, along with 55 hours of community service in just one semester, reflect my commitment to growth, involvement, and leadership. I enjoy being part of communities where I can make a difference, whether on campus or back home. This is one reason I chose Ohio State, I knew that I would be able to thrive and pursue all my interests, whether they be social or professional, I knew it was a school that would help me accomplish all my goals. I also chose Ohio State because it was exactly what I was looking for; a big, competitive school, with lots of school spirit, and opportunities. When I visited in April of 2024, I knew immediately that it was the place I was meant to be.

Outside of school, I've also explored entrepreneurship and volunteer work. I helped launch Operation Sleep Tight, a charity that delivers stuffed animals and books to kindergarteners and organized a Date Night event that provided free childcare for families. I've consistently looked for ways to combine my interests in leadership and service, both of which I hope to bring into my professional career.

I am deeply inspired by companies like Amazon, whose operational excellence and rapid growth have revolutionized modern business and the operations and supply chain field. Their commitment to speed, innovation, and customer satisfaction reflects everything I admire in a business. With experience managing as expo, strong organizational skills, and a growing academic foundation in operations, I am excited to continue developing my abilities in real-world settings. My approach to work, clear communication style, and passion for improvement make me a strong candidate for operations roles. As I continue my studies and gain more hands-on experience, I am eager to grow within the business world and make meaningful contributions.

Meet Gabby!

Gabby Smith

Sophomore

Major – Operations Management

Minor – Real Estate

High School - Winton Woods

Hometown – Cincinnati, OH

My name is Gabrielle Smith, and I am currently a second-year student at The Ohio State University, pursuing a bachelor's degree in Business Administration with a specialization in Operations Management and a minor in Real Estate. I chose to major in Operations Management because I am interested in a career in supply chain management, where I can apply strategic thinking and problem-solving to optimize business operations. This field aligns with my passion for improving efficiency and coordinating the many moving parts within an organization. Originally from Cincinnati, Ohio, I chose Ohio State for its prime location, outstanding business program, and because I have been a lifelong fan of Buckeye football. From the start, I knew this university would offer me the opportunity to connect with inspiring people and become part of a community of like-minded individuals. Although I have only completed my freshman year, I have been intentional about seeking leadership and growth opportunities. I am currently a member of the Entrepreneur and Innovation Scholars Program, where I have had the opportunity to engage with industry professionals and startup CEOs. I am excited to continue my involvement in this program and look forward to building meaningful connections throughout my time at Ohio State.

Meet Sadie!

Sadie Zelin

Freshman

Major(s) – Operations Management

High School - Shaker Heights

Hometown – Shaker Heights, OH

My name is Sadie Zelin and I am from Cleveland, Ohio. I recently graduated from Shaker Heights High School in June of 2025. I am looking forward to starting at The Ohio State University this fall to pursue a degree in Business Administration with a specialization in Operations Management. I am also an Art Scholar so I will be living and learning with other students on campus interested in the Arts.

I chose The Ohio State University not only because of the rigorous programs but also to continue the family legacy of Buckeye alumni as I will be the fourth generation in my family to attend The Ohio State University.

In high school I spent a majority of my time in a leadership role as the stage manager in the Theatre Department at Shaker Heights High School. I have managed over 30 students, handling their schedules, communications, and all of the details of the production timeline. It allowed me to highlight my skills of being organized, creative and successful at leading others. I also learned about marketing, fundraising and operations in this role which has led me to become interested in Business and Operations Management.

My goal for when I attend Fisher College of Business is to challenge myself to new experiences, get involved in organizations and clubs on campus; such as women in business, the pathways to supply chain, OUAB, and participate in study abroad programs while learning about new cultures and countries. I look forward to joining a cohort of diverse students who would support me and help me grow as a student. I am very interested in collaborating with others and working as a team while developing my leadership skills. I love starting projects and seeing them develop from start to finish. Fisher College of Business has many experiential learning opportunities that provide mentorship to students, and I hope to take advantage of all that is offered.

Newsletter Recap

August – First Day of Fall Semester

September 5 – Pathways Orientation

What's coming up?

October 16 & 17 Fall Break

October 10 - Nationwide

October 24 - DHL
