

# Zoom - Passwords on Recordings

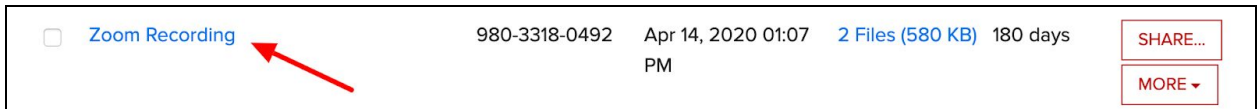

In an effort to help secure Zoom meetings, ODEE put in place enforced passwords on Zoom Meetings. This password also occurs in Zoom recordings.

If you are sharing links to Zoom recordings in Carmen or other means, you need to share the password.

To access that password or change it, access your Zoom recordings

Then select the recording you want to access

Select the Share button

On the pop-up screen you will find the password. That's where you can change and save it.
