RUBBER DYNAMICS

August 26, 2026

Certificate of Proposition 65 Compliance

Product Series: Rubber Dynamics EPDM Series Compounds

Applicable Compounds:

- E700100, E700102, E700101

This document certifies that the Rubber Dynamics EPDM Series compounds listed above comply with the California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65).

Under normal and foreseeable conditions of use, exposure to chemicals in these compounds does not exceed the No Significant Risk Levels (NSRL) for carcinogens or the Maximum Allowable Dose Levels (MADL) for reproductive toxicants **as listed in the California Proposition 65 list of chemicals dated December 29, 2023.** Consequently, a Proposition 65 warning label is not required for these products.

Please note that these compounds contain Carbon Black, which is listed under Proposition 65. However, California's listing specifies Carbon Black only as "airborne, unbound particles of respirable size." In the listed Rubber Dynamics compounds, the Carbon Black is fully bound and encapsulated within the rubber matrix. Because the chemical is not present in an airborne or respirable form, it does not trigger an exposure warning requirement under the statute.
