Certificate of Proposition 65 Compliance

Product Series: Rubber Dynamics FPVC (Polyvinyl Chloride) Compound

This document certifies that the Rubber Dynamics FPVC compound listed above comply with the California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65).

Under normal and foreseeable conditions of use, exposure to chemicals in these compounds does not exceed the No Significant Risk Levels (NSRL) for carcinogens or the Maximum Allowable Dose Levels (MADL) for reproductive toxicants as listed in the California Proposition 65 list of chemicals dated December 29, 2023. Consequently, a Proposition 65 warning label is not required for these products.

Please note that these compounds contain Phthalate plasticizers and Titanium Dioxide, which are listed under Proposition 65. However, California's listing restricts Titanium Dioxide to "airborne, unbound particles of respirable size". Because these chemicals are fully bound, encapsulated, and immobilized within the solid FPVC polymer matrix, they are not present in an exposable or respirable form and do not trigger a warning requirement.
