

DIGITAL TEAM DEPLOYMENT SERVICE

Digital Teams, deployed.

A 12-month path from knowing you must deploy AI to full-scale digital teams realizing measured value.

WHAT IS A DIGITAL TEAM?

AI-powered agents that work alongside your analytics and run **entire workflows** across your tech stack, up to the point where your expert approval is required. Every digital team is trained and customized to how you work. There's no off-the-shelf version.

WHAT THAT BUYS YOU

Data validation, exception handling and model monitoring, reporting, and reconciliation run continuously across time zones. Your people keep doing the complex, non-standard thinking and make the final call.

THE 12-MONTH ENGAGEMENT

01 Concept

DAYS 1-90

Map where digital teams generate value, prove the concept, and agree how value gets measured.

Complimentary: includes feasibility report + Phase 2 roadmap

02 Pilot

MONTHS 3-6

Deploy one digital team, validate its output, refine it against your baseline metrics.

Fixed fee: includes baseline metrics and a scaled rollout plan

03 Scale

MONTHS 6-12

Scale teams across prioritized workflows, continuously optimize as volume and confidence grow, measure realized value.

Value-based fee: includes quarterly savings statement and optimization plan

\$0

Cost to prove it works in weeks, not months. Phase 1 requires no access to your infrastructure or data, running on externalized and on synthetic data.

The barrier to proof isn't your data or your budget.

FRG proves value before you commit.

This is for you if you:

WANT TO GROW

You want to use digital teams to grow

HAVE A GAP

You have the technology, not the deployment

NEED TO FOCUS

You need to know where value is greatest

WANT PROOF

You prefer proof before you commit

Start with phase one at no cost.

BOOK YOUR 90-DAY PROOF OF CONCEPT
