

WALL MOUNTED MARKER BOARDS MOUNTING INSTRUCTIONS

Models
NEX134WMB and NEX146WMB

Your Nexus Wall Mounted Marker Board is designed for mounting on a variety of wall surfaces. Because of the wide variation of mounting surface construction, specific mounting hardware is not included. (#12 pan head type self-tapping screws are recommended.)

For the most secure mounting, fasten the board directly to as many wall studs as possible. When wall studs cannot be used, Ghent recommends using #12 expandable type wall anchors (not included).

Ghent recommends that at least two people install the board.

- 1.** Determine the desired height from the floor to the bottom of the board. Scribe a level line on the wall at that distance.
- 2.** Using the chart below, transfer the hole locations for your board size to the wall and mark the hole locations. Check for squareness using the "C" dimension in the chart
- 3.** Drill and Install screws (wall anchors if required) into the wall. Allow approximately 1/8" between the rear of the screw head and the surfaces of the wall, for hanger clearance.
- 4.** Complete the mounting by lifting the board onto the installed screws.

ITEM NUMBER	A	B	C (REF)
NEX134WMB	44"	32"	54 1/2"
NEX146WMB	68"	44"	81 1/16"
