

Renewal Whiteboards

Renewal whiteboards from Ghent offer a simple way to update old, worn-out boards.

Renewal boards are designed to attach directly over existing framed boards with no need to remove the old boards. With Renewal, simply order to the exact size of the original board to be covered including frame, but not the tray.

All Renewal whiteboards feature 28-gauge porcelain writing surfaces completely surrounded by satin-anodized aluminum trim with no marker trays. Factory pre-drilled holes in the aluminum framing make installation quick and easy. Renewal whiteboards will provide added years of reliable service and are backed by Ghent's 50-year performance guarantee.
