GPA Introduces Setalux Fabric with North American Exclusive

McCook, III – GPA announces the addition of Setalux Fabric to their collection of Liquid Ink X branded substrates for HP Indigo presses. With its soft, textured surface, this fabric transforms any project into a work of art. Now, printers, brand owners, and graphic designers can find this material in North America exclusively at GPA.

Offering the rich woven appearance expected from a textile, Setalux Fabric is perfect for creating photo books and yearbooks in short runs, crafting packaging for high end products, and making museum-quality art prints on demand. Unlike similar products, Setalux Fabric will not crack or whiten along folded edges thanks to its premium construction.

Setalux Fabric can be transformed through a variety of finishing processes, including folding, blind stamping, foil stamping, and die cutting. Engineered for optimal press performance, Setalux Fabric offers superb ink transfer, ink adhesion, and excellent image reproduction. It also provides strength with resistance to marring and abrasion.

GPA currently offers Setalux Fabric in 13" x 19" and 20.8" x 27.5" sheets for HP Indigo presses with One Shot mode. For more information or to request sample sheets, contact GPA at 800.395.9000 or hello@gpa-innovates.com.
