Bruce,
I'm reviewing the improvements plans, but it is difficult for me to do so since I do not have the redlines in front of me. Do you have them?

Hi Bruce,
All you need to do is compose a letter to the county engineer, Greg Stanley, stating why an overlength cul-de-sac is required for this project. Pinal County Public Works do not have a variance form for this. If you have any more questions, please feel free to contact me.

Thanks,

Angeline To

Angeline,

In the event you have never received this from Regional Fire Rescue I am forwarding it to you. Please see the attached variance request. The plans you currently have in your possession have been revised to be in compliance with this request as agreed with Chief Kerber.

Is there a variance form or waiver form from Public Works that I need to have filled out? I'm not sure how to proceed with the over-length cul-de-sac.

Thanks,
Bruce K.

Hello Bruce:

Although I did not in fact, have a copy of the variance letter in the file, I did locate the letter you referenced in my computer file dated March 15th 2006. That letter was addressed to, and mailed to your office. But I have revised the letter showing it being addressed to Pinal County, and forwarded the same as an advance copy.

I am attaching the letter in this email, and will return your check and an original letter via US Mail.

Thanks very much for your patience and sorry about the confusion.

Best Regards,
Chief Steve
