Independent Auditor's Report

Board of Directors
Telluride Fire Protection District
Telluride, Colorado

INDEPENDENT AUDITOR'S REPORT

We have audited the accompanying financial statements of the governmental activities and each major fund of the Telluride Fire Protection District (the District), as of and for the year ended December 31, 2016, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and each major fund of the District as of December 31, 2016, and the respective changes in financial position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 3 through 7 and the budgetary comparison information on pages 31 and 32 be presented to supplement the basic financial statements. Government Accounting Standards Board Statement No. 68, *Accounting and Financial Reporting for Pensions* – an amendment of GASB No. 27, requires that the Schedules of the District's Proportionate Share of the Net Pension Asset of the Statewide Defined Benefit Plan – A Cost-Sharing Multiple-Employer Defined Benefit Pension Plan Administered by the Fire & Police Pension Association, the Schedules of District Contributions to the Statewide Defined Benefit Plan – A Cost-Sharing Multiple-Employer Defined Benefit Pension Plan Administered by the Fire & Police Pension Association, the Volunteer Plan Schedules of Changes in Net Pension Liability and Related Ratios – Last 10 Years (to be built prospectively), and the Volunteer Plan Schedules of Contributions – Last 10 Years (to be built prospectively) on pages 33 through 36 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements as a whole. The supplemental schedules of Revenues, Expenditures, and Changes in Fund Balance – General Fund and supplemental schedules of Revenues, Expenditures, and Changes in Fund Balance – Debt Service Fund on pages 37 through 38 are presented for purposes of additional analysis and are not a required part of the basic financial statements. These supplemental schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplemental schedules on pages 37 through 38 are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Management's Discussion and Analysis

TELLURIDE FIRE PROTECTION DISTRICT
MANAGEMENT'S DISCUSSION AND ANALYSIS

For the year ended December 31, 2016

As management of the Telluride Fire Protection District (the District), we offer readers of the District's financial statements this narrative overview and analysis of the financial activities of the District for the year ended December 31, 2016 with comparative information presented for the year ended December 31, 2015. We encourage readers to consider the information presented here in conjunction with the additional information furnished in our basic financial statements to better understand the financial position of the District.

Financial Highlights

- In the government-wide financial statements, the District's assets and deferred outflows exceeded its liabilities and deferred inflows by \$7,638,340 at December 31, 2016. In addition, the District's revenues were \$486,818 greater than expenses for the year ended December 31, 2016.
- The General Fund reported an ending unassigned fund balance of \$4,189,571 at December 31, 2016, a decrease of \$1,120,696 from the prior year.
- The Debt Service Fund reported an ending fund balance of \$171,462 at December 31, 2016, an increase of \$13,736 from the prior year.
- During the year ended December 31, 2015, the District adopted Governmental Accounting Standards Board Statement No. 68, *Accounting and Financial Reporting for Pension (GASB 68)*. GASB 68 establishes accounting and financial reporting standards for measuring and recognizing assets, liabilities, deferred outflows of resources, deferred inflows of resources, and expenses for pensions that are provided to the employees of state and local governmental employers through pension plans (see Note 8).

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The basic financial statements are comprised of three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the basic financial statements. This report also contains required and other supplemental information in addition to the basic financial statements themselves.

Government-wide Financial Statements

The government-wide financial statements are designed to provide readers with a broad overview of the District's finances in a manner similar to a private sector business.

The statement of net position presents information on all of the District's assets, deferred outflows of resources, liabilities, and deferred inflows of resources, with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether financial position is improving or deteriorating. As previously mentioned, as of and for the year ended December 31, 2015, the District implemented GASB 68. GASB 68 establishes accounting and financial reporting standards for measuring and recognizing assets, liabilities, deferred outflows of resources, deferred inflows of resources, and expenses for pensions that are provided to the employees of state and local governmental employers through pension plans.

The statement of activities presents information showing how the District's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of cash flows. Thus, revenues and expenses are reported in the statement of activities for some items that will only result in cash flows in future fiscal periods.

In the government-wide financial statements, the District's activities are shown in one category; *governmental activities*. The District's activities are principally supported by property taxes and charges for services.

The government-wide financial statements can be found on pages 8 through 10.

Fund Financial Statements

A fund is a group of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. Fund accounting is used to ensure and demonstrate compliance with finance-related legal requirements. The District's funds are all considered governmental funds.

Governmental Funds

Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental funds balance sheet and the governmental funds statement of revenues, expenditures and changes in fund balance provide a reconciliation to facilitate this comparison between governmental funds and governmental activities. The District presents two governmental funds; the General Fund and the Debt Service Fund. The District's governmental funds financial statements can be found on pages 11 and 13.

An annual appropriated budget was adopted for funds. Budgetary comparison schedules have been provided on pages 31 and 32 to demonstrate compliance with the adopted budget.

Notes to Basic Financial Statements

The notes to the basic financial statements provide additional information that are essential to a full understanding of the data provided in the government-wide and fund financial statements.

The notes to the basic financial statements can be found on pages 15 through 30.

Required Supplementary Information (RSI)

The RSI presents additional information that differs from the basic financial statements in that the auditor applies certain limited procedures in reviewing the information. In this report, RSI includes the management's discussion and analysis and budgetary comparison schedules, as well as certain RSI required by GASB 68 including the:

- Schedules of the District’s Proportionate Share of the Net Pension Asset of the Statewide Defined Benefit Plan – A Cost-Sharing Multiple-Employer Defined Benefit Pension Plan Administered by the Fire & Police Pension Association
- Schedules of District Contributions to the Statewide Defined Benefit Plan – A Cost-Sharing Multiple-Employer Defined Benefit Pension Plan Administered by the Fire & Police Pension Association
- Volunteer Schedules of Changes in Net Pension Liability / (Asset) and Related Ratios – Last 10 Years (to be built prospectively)
- Volunteer Schedules of Contributions – Last 10 Years (to be built prospectively)

Comparison schedules of fund revenues, expenditures, and changes in fund balance for the current year and two prior years have been presented on pages 36 and 37.

Government-wide Financial Analysis

The following summarizes the District’s governmental net position as of December 31:

Net Position – December 31	<u>\$ 7,638,340</u>	<u>\$ 7,151,522</u>

Financial Analysis of Governmental Funds

As noted earlier, fund accounting is used to ensure and demonstrate compliance with finance related legal requirements.

The focus of governmental funds is to provide information on near-term inflows, outflows and balances of spendable resources. In particular, unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

The District has two major governmental funds, the General Fund and the Debt Service Fund. The General Fund had a fund balance of \$5,865,408 as of December 31, 2016, of which \$60,548 is nonspendable for prepaid maintenance contracts and insurance, \$78,000 is restricted for emergencies and \$1,537,289 is assigned for capital outlay. The unassigned portion of the fund balance in the amount of \$4,189,571 is available for general spending. The Debt Service Fund had a fund balance restricted for debt service of \$171,462 as of December 31, 2016, and paid \$358,560 in principal and interest.

General Fund Budgetary Highlights

The District did not amend its originally adopted budget for the General Fund. Total expenditures were in excess of revenues by \$202,859. Total expenditures were \$233,284 under budget, mainly due to a budgeted training officer position that was not filled and certain capital outlays that were deferred to 2017. The budget amounts as shown on pages 31 and 32 of the financial statements include the adopted budget for the General Fund and Debt Service Fund.

Capital Assets

Replacements, which improve or extend the lives of property, are capitalized. Maintenance, repairs, and equipment replacements of a routine nature are charged to expenditures as incurred and are not capitalized. Additional information on the District's capital assets can be found in Note 6.

The District has assigned resources at December 31, 2016 for capital expenditures to occur in 2017. See Note 1 – Fund Balance Classification.

Long-Term Debt

In January of 2013, the District advance refunded the existing 2004 general obligation bonds. The 2004 bonds were completely paid off in 2014, leaving only the 2013 General Obligation Refunding Bonds. This is discussed further in Note 7.

Economic Factors and Next Year's Budget

The 2017 approved budget reflects a predicted nominal increase in tax revenue from the prior year. Budgeting remains conservative for the purposes of the general fund, day to day operations and long-term Master Plan projects; however, the District Board of Directors (the Board) accepted management's recommendation to utilize funds from the General Operating Reserve (GOR) to address two significant projects that were deferred in prior years due the economic lull (deferred apparatus replacements) directed from the Reserve Fund Philosophy. These projects include a purchase of an additional Transport/Reserve Ambulance and replacement of a thirty year old Aerial apparatus for Station 2. An additional project was completed based on an opportunity to trade a 2003 aerial for a 2006 aerial that better serves the community needs. We continue to utilize our Master Plan to direct our long-term apparatus and facility needs with the continued intent of maintain a health reserve fund for unanticipated needs. The conservative approach continues to have importance due to the forecasted decrease in revenue due to legislative language in the Gallagher Amendment and TABOR Amendment.

Request for Information

This financial report is designed to provide a general overview of the District's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the District Chief, P.O. Box 1645, Telluride, CO 81435.

December 31, 2016	(46,118)	2,135
Change in Net Position of Governmental Activities		<u>\$ 486,818</u>

See accompanying notes.

Notes to Basic Financial Statements

TELLURIDE FIRE PROTECTION DISTRICT

NOTES TO BASIC FINANCIAL STATEMENTS

December 31, 2016

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements of the Telluride Fire Protection District (the District) have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles.

The District's more significant accounting policies are described below:

Financial Reporting Entity

The District is a political subdivision of the State of Colorado, formed in 1966 for the purpose of providing fire protection and emergency medical services to the Telluride, Colorado area. The District is governed by an elected five-member board (the Board).

Government-wide Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the District. *Governmental activities* are supported by taxes and charges for services. The District has no *business-type activities*, which rely to a significant extent on user charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or program. *Program revenues* include 1) charges to those who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Fund Financial Statements

The accounts of the District are organized on the basis of funds. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, deferred inflows of resources, fund equity, revenues, and expenditures. Government resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled.

Governmental funds are accounted for on a flow of current financial resources basis. Balance sheets for these funds generally include only current assets and current liabilities. Reported fund balances are considered a measure of available, spendable resources. Operating statements for these funds present a summary of available, spendable resources, and expenditures for the period.

For the year ended December 31, 2016, the District has two funds, the General Fund, which is the District's primary operating fund that accounts for all financial resources of the District, except those required to be accounted for in another fund; and the Debt Service Fund, which is the fund that accounts for principal and interest payments on outstanding bonds of the District. Both funds are considered major funds.

Separate financial statements are provided for governmental funds.

Measurement Focus and Basis of Accounting

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*. Revenues are recorded when earned and expenditures are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The modified accrual basis of accounting is used by all governmental funds. Under the modified accrual basis of accounting, revenues are recognized when susceptible to accrual (i.e., when they become both measurable and available). “Measurable” means the amount of the transaction can be determined, and “available” means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. Revenues are considered available if collected within 60 days after year end. Those revenues associated with the current period susceptible to accrual are property taxes, interest revenue, and charges for services. Grant revenues are recognized as they are earned. All other revenues are reported when cash is received. Expenditures are recorded when the related fund liability is incurred. Exceptions to this general rule include principal and interest on general long-term debt which is recognized when due, and compensated absences which are recognized when the obligations are expected to be liquidated with available financial resources.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

Investments

Money market funds and external investment pools are stated at cost, which is equal to fair value.

The District invests in certificates of deposit (CDs) with varying lengths of maturity. CDs of the District have original maturities of greater than 90 days and are presented as investments on the statements. CDs are reported at cost, which approximates fair value.

Property Taxes

Property taxes for the current year are levied in December of the previous year and attach as a lien on property the following January 1. They are payable in full by April 30, or in two equal installments due February 28, and June 15. Property taxes for 2016 are reported as a receivable and deferred inflow of resources at December 31. The deferred taxes are reported as revenue in the year in which the lien attaches and they are available and collected.

Capital Assets

Capital assets are stated at cost. Donated assets are recorded at their estimated fair market value at the date of donation. The District defines capital assets as assets with an initial cost of more than \$10,000. Replacements, which improve or extend the lives of property, are capitalized. Maintenance, repairs, and equipment replacements of a routine nature are charged to expenditures as incurred and are not capitalized.

Capital assets are depreciated using the straight-line method over the following useful lives:

Buildings and improvements	25 - 50 years
Fire apparatus	20 years
Other equipment	3 - 10 years
Ambulances	10 years
Other vehicles	6 years

Long-term Debt

In the government-wide financial statements, long-term debt is reported as a liability in the statement of net position. Bond issuance premiums and discounts, as well as losses on refinancing, are deferred and amortized over the life of the related debt using the straight-line method. Bond obligations payable are reported net of the applicable bond premium or discount and refinancing losses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as program expenses.

In the fund financial statements, issuance costs are recognized when incurred. The face amount of the debt issued, premiums, and discounts received on debt issuances are reported as other financing sources and uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Compensated Absences

Vacation

Full-time employees accumulate vacation time after the first full year of employment. Eligible personnel accumulate two weeks of vacation after the first full year of employment up to a maximum of eight weeks (320 hours) after ten years of service. Upon separation, employees receive pay for unused vacation. This liability is recorded in the government-wide financial statements.

Sick Leave

The District provides for the accumulation of paid sick leave benefits for personnel at the rate of four hours for each full month worked. Sick leave is accumulated from year to year up to a maximum of ten days (80 hours). Upon separation, employees do not receive pay for unused sick leave.

Deferred Outflows of Resources and Deferred Inflows of Resources

GASB Statement No. 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources and Net Position* (GASB 63), defines the five elements that make up a statement of financial position to include:

- Assets – resources with a present service capacity under District control
- Deferred Outflows of Resources – consumption of net assets by the District that is applicable to a future reporting period
- Liabilities – present obligations to sacrifice resources
- Deferred Inflows of Resources – acquisitions of net assets by the District that is applicable to a future reporting period
- Net Position – residual of all other elements presented in a statement of financial position

See Note 8 for detail of the composition of the District's deferred outflows of resources and deferred inflows of resources related to pensions.

Net Position

Net position represents the difference between assets, deferred outflows of resources, liabilities, and deferred inflows of resources. Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing attributable to the acquisition or construction of improvements of those assets. Net position is reported as restricted when there are limitations on their use due to external restrictions imposed by creditors, grantors, laws or regulations of other governments.

Due to and Due from Other Funds

Inter-fund receivables and payables arise from inter-fund transactions and are recorded by all funds affected in the period in which transactions are executed.

Fund Balance Classification

The governmental fund financial statements present fund balances based on classifications that comprise a hierarchy that is based primarily on the extent to which the District is bound to honor constraints on the specific purposes for which amounts in the respective governmental funds can be spent. The classifications used in the governmental fund financial statements are as follows:

- **Nonspendable:** This classification includes amounts that cannot be spent because they are either (a) not in spendable form or (b) are legally or contractually required to be maintained intact. The District had nonspendable resources for prepaid maintenance contracts and insurance as of December 31, 2016 in the amount of \$60,548.
- **Restricted:** This classification includes amounts for which constraints have been placed on the use of the resources either (a) externally imposed by creditors (such as through a debt covenant), grantors, contributors, or laws or regulations of other governments, or (b) imposed by law through constitutional provisions or enabling legislation. The District has classified the Taxpayer's Bill of Rights (TABOR) emergency reserves as being restricted because their use is restricted by State Statute. The District has classified the amount restricted for payment of debt service as being restricted because their use is restricted by the financial institution with which the District has a revenue bond.
- **Committed:** This classification includes amounts that can be used only for specific purposes pursuant to constraints imposed by formal action of the District's Board. These amounts cannot be used for any other purpose unless the Board removes or changes the specified use by taking the same type of action (ordinance or resolution) that was employed when the funds were initially committed. This classification also includes contractual obligations to the extent that existing resources have been specifically committed for use in satisfying those contractual requirements. The District did not have any committed resources as of December 31, 2016.
- **Assigned:** This classification includes amounts that are constrained by the District's intent to be used for a specific purpose but are neither restricted nor committed. This intent can be expressed by the Board or through the Board delegating this responsibility to the District manager through the budgetary process. The District had assigned resources for future capital outlay as of December 31, 2016 in the amount of \$1,537,289. Through the budgetary process, this amount has been assigned for various capital outlay projects.
- **Unassigned:** This classification includes the residual fund balance for the General Fund.

The District would typically use committed resources first and then assigned resources as appropriate opportunities arise, but the District reserves the right to selectively spend unassigned resources first to defer the use of these other classified funds.

NOTE 2 - RECONCILIATION OF GOVERNMENT-WIDE FUND FINANCIAL STATEMENTS

The governmental fund balance sheet includes a reconciliation between *fund balance* of the *governmental fund* and *net position of governmental activities* as reported in the government-wide statement of net position. Additionally, the governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between the *net change in fund balances* of the *governmental fund* and the *changes in net position of governmental activities* as reported in the government-wide statement of activities. These reconciliations detail items that require adjustment to convert from the current resources measurement and modified accrual basis for government fund statements to the economic resources measurement and full accrual basis used for government-wide statements.

NOTE 3 - TAX, SPENDING AND DEBT LIMITATIONS

Colorado voters passed an amendment to the State Constitution, Article X, Section 20, commonly known as TABOR, which has several limitations including revenue raising, spending abilities, debt limitations, and other specific requirements of state and local governments. TABOR is complex and subject to judicial interpretation. The District believes it is in compliance with the requirements of TABOR. TABOR requires a reserve of 3% of the District's fiscal year spending, excluding bonded debt service. A portion of the District's General Fund balance is classified as restricted for emergencies required by TABOR (see Note 1).

In 1996, the voters authorized the District to increase the mill levy from 1.416 mills to 2.465 mills for taxes collected in 1997 and subsequent years.

NOTE 4 - BUDGETS

The District adheres to the following procedures in establishing the budgetary data reflected in the financial statements:

- A. Budgets are required by state law.
- B. The budget officer is required to submit a proposed budget to the Board by October 15.
- C. Public hearings are conducted by the Board to obtain taxpayer comments.
- D. Certification of the mill levies to the Board of County Commissioners and adoption of the budget and appropriations are required by December 15.
- E. Expenditures may not legally exceed appropriations at the fund level. Board approval is required for changes in the budget. The District did not amend its originally adopted 2016 budget. The District expended less than was appropriated during 2016.
- F. Budget appropriations lapse at the end of each year.
- G. Budgets are adopted on the modified accrual basis of accounting.

NOTE 5 - DEPOSITS AND INVESTMENTS

The Colorado Public Deposit Protection Act (PDPA) governs the District's deposits. The statutes specify eligible depositories for public cash deposits which must be Colorado institutions and must maintain federal deposit insurance through the Federal Deposit Insurance Corporation (FDIC) on deposits held. Each eligible depository with deposits in excess of the insured levels must pledge a collateral pool of defined eligible assets maintained by another institution or held in trust for all of its local government depositors as a group with a market value at least equal to 102% of the uninsured deposits. The Colorado

Division of Banking for banks, savings and loan associations is required by statute to monitor the naming of eligible depositories and reporting of the uninsured deposits and assets maintained in the collateral pools.

At December 31, 2016, the carrying amount of the District's deposits with maturities less than one year consisted of the following:

	Bank Balance	Carrying Amount
Cash in checking accounts	\$ 1,265,897	\$ 1,195,559
Money market account	7,207	7,207
	<u>\$ 1,273,104</u>	<u>\$ 1,202,766</u>

At December 31, 2016, the carrying amount of the District's deposits with maturities over one year consisted of the following:

	Bank Balance	Carrying Amount
Certificates of deposit	<u>\$ 449,821</u>	<u>\$ 449,821</u>

At December 31, 2016, \$500,000 was covered by depositor's insurance and \$1,152,587 was collateralized under PDPA requirements.

Custodial Credit Risk – Deposits and Investments

Custodial credit risk is the risk that in the event of a bank or investment pool failure, the District would not be able to recover its deposits or the value of its investments. The District's deposits and investments are not deemed to be subject to custodial credit risk as they are covered by the FDIC or are collateralized under PDPA.

Colorado statutes specify investment instruments meeting defined rating and risk criteria in which local government entities may invest including: obligations of the United States and certain U.S. government agency securities; certain international agency securities; general obligation and revenue bonds of U.S. local government entities; bankers' acceptances of certain banks; commercial paper; local government investment pools; written repurchase agreements collateralized by certain authorized securities; certain money market funds; and guaranteed investment contracts. The District has no investment policy that would further limit its investment choices.

COLOTRUST is an investment vehicle established for local government entities in Colorado to pool surplus funds for investment purposes. COLOTRUST is routinely monitored by the Colorado Division of Securities with regard to its operations and investments, which are also subject to provisions of C.R.S. Title 24, Article 75, Section 6. The fair value of the investments in COLOTRUST is the same as the value of the pool shares.

The pool operates similarly to a money market fund and each share is equal in value to \$1.00. Pool investments include U.S. Treasury and Agency securities, the highest rated commercial paper and repurchase agreements collateralized by U.S. Treasury and Agency securities. The Pool is rated AAAM by Standard and Poor's. Financial statements for COLOTRUST may be obtained on their website at www.colotrust.com.

Description	Credit Quality Rating	Maturity	Fair Value
COLOTRUST Plus+	AAAM	N/A	\$ 4,237,191

Interest Rate Risk – Investments

Colorado revised statutes limit investment maturities to five years or less unless formally approved by the Board. The Board has not adopted an investment policy that allows investment maturities greater than five years.

Concentrations of Credit Risk – Deposits and Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer or institution. The District holds 100% of its cash deposits in one financial institution. The District holds 91% of its investments in one financial institution, 5% in a second financial institution, and 4% in a third financial institution.

NOTE 6 - CAPITAL ASSETS

Capital assets activity for the year ended December 31, 2016 was as follows:

	Balance December 31, 2015	Increases	Decreases	Balance December 31, 2016
Non-depreciable capital assets				
Land and land improvements	\$ 594,122	\$ -	\$ -	\$ 594,122
<i>Total non-depreciable capital assets</i>	<u>594,122</u>	<u>-</u>	<u>-</u>	<u>594,122</u>
Depreciable capital assets				
Buildings and improvements	4,105,180	-	-	4,105,180
Fire apparatus, ambulances and other vehicles	4,080,771	513,505	-	4,594,276
Other fire support equipment	454,426	108,376	-	562,802
<i>Total depreciable capital assets</i>	<u>8,640,377</u>	<u>621,881</u>	<u>-</u>	<u>9,262,258</u>
Less accumulated depreciation for:				
Buildings and improvements	(1,905,564)	(85,787)	-	(1,991,351)
Fire apparatus, ambulances and other vehicles	(2,629,425)	(192,432)	-	(2,821,857)
Other fire support equipment	(253,271)	(69,344)	-	(322,615)
<i>Total accumulated depreciation</i>	<u>(4,788,260)</u>	<u>(347,563)</u>	<u>-</u>	<u>(5,135,823)</u>
<i>Total capital assets being depreciated, net</i>	<u>3,852,117</u>	<u>274,318</u>	<u>-</u>	<u>4,126,435</u>
<i>Total capital assets, net depreciation</i>	<u>\$ 4,446,239</u>	<u>\$ 274,318</u>	<u>\$ -</u>	<u>\$ 4,720,557</u>

Depreciation expense was charged to functions/programs of the District as follows: ambulance (\$69,344); fire prevention (\$192,432); and general operating (\$85,787).

NOTE 7 - LONG-TERM LIABILITIES

Land Leases

The District leases land from the Town of Telluride (the Town) on which the District's main facility resides, under an agreement dated June 17, 1997. The lease expires June 30, 2085 and requires an annual rental of \$10. The building and improvements, excluding equipment, are part of the leased premises. The District has the first right of refusal to purchase the leased premises should the Town desire to sell the leased premises.

The District has an intergovernmental agreement with the Mountain Village Metropolitan District and the Town of Mountain Village, dated August 8, 2010, relating to ownership of a joint service facility on land owned by the District located in Mountain Village, Colorado. The agreement continues indefinitely,

subject to annual appropriation by the entities. Each entity has an undivided ownership interest in the joint facility in accordance with the following percentages:

Telluride Fire Protection District 54%
 Town of Mountain Village 46%

The District leases land from San Miguel County, Colorado for a facility in Placerville, Colorado. The lease, dated December 18, 1984, is for a period of 99 years and requires no rental payments.

General Obligation Bonds

In February 2013, the District issued General Obligation Refunding Bonds, Series 2013 (GO Refunding Bonds 2013) of \$3,080,000. Principal is payable annually on December 1 beginning on December 1, 2015, with interest (rates from 2.0% to 2.5%) payable semiannually beginning June 1, 2013 and semiannually thereafter maturing on December 1, 2024. The net proceeds were used to advance refund the GO Bonds 2004 maturing on and after December 1, 2015. Additionally, the total proceeds received by the District included a net reoffering premium of \$113,416 and proceeds from the sale of registered B coupons amounting to \$210,022. The premium is amortized over the life of the GO Refunding Bonds 2013. All of the taxable property in the District is subject to the levy of an ad valorem tax to pay the principal of, interest on, and premium, if any, on the GO Refunding Bonds 2013 without limitation as to rate and in an amount sufficient to pay the Bonds when due.

The minimum future obligations on the GO Refunding Bonds 2013, are as follows:

<u>Year</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2017	\$ 300,000	\$ 56,850	\$ 356,850
2018	310,000	50,850	360,850
2019	310,000	44,650	354,650
2020	315,000	38,450	353,450
2021	320,000	32,150	352,150
2022 and thereafter	1,030,000	52,000	1,082,000
<i>Total minimum future obligations payments</i>	<u>\$ 2,585,000</u>	<u>\$ 274,950</u>	<u>\$ 2,859,950</u>

Changes in long-term liabilities:

	<u>Balance December 31, 2015</u>	<u>Additions</u>	<u>Reductions</u>	<u>Balance December 31, 2016</u>	<u>Due Within One Year</u>
GO refunding bonds 2013	\$ 2,880,000	\$ -	\$ (295,000)	\$ 2,585,000	\$ 300,000
Original issue premium, net	85,063	-	(9,451)	75,612	-
<i>Long-term debt</i>	2,965,063	-	(304,451)	2,660,612	300,000
Accrued compensated absences	48,253	29,365	(31,500)	46,118	-
<i>Total long-term liabilities</i>	<u>\$ 3,013,316</u>	<u>\$ 29,365</u>	<u>\$ (335,951)</u>	<u>\$ 2,706,730</u>	<u>\$ 300,000</u>

Interest expense of \$53,618 on long-term debt has been included in the direct expenses of individual functions on the government-wide statement of activities. Authorization for general long-term debt is specific to a particular purpose; thus, an objective connection can be made to a specific program. All interest on long-term debt is reported as a direct expense of the program for which borrowing is related.

NOTE 8 - PENSION PLANS

Paid Full-Time Personnel

The District participates in the Statewide Defined Benefit Plan (SWDB Plan), a cost-sharing multiple-employer defined benefit pension fund administered by the Fire and Police Pension Association (FPPA). The net pension asset, deferred outflows of resources and deferred inflows of resources related to pensions, pension expense, information about the fiduciary net position, and additions to/deductions from the fiduciary net position of the SWDB Plan have been determined using the economic resources measurement focus and the accrual basis of accounting. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value. Eligible employees of the District are provided with pensions through the SWDB Plan. FPPA issues a publicly available comprehensive annual financial report that can be obtained on FPPA's website at <http://fppaco.org>.

FPPA provides retirement, disability, and survivor benefits. Retirement benefits are determined by the amount of service credit earned and/or purchased, highest average salary, the benefit structure(s) under which the member retires, the benefit option selected at retirement, and age at retirement. Retirement eligibility is specified in tables set forth at C.R.S. § 24-51-602, 604, 1713, and 1714. A member is eligible for a normal retirement pension once the member has completed twenty-five years of credited service and has attained the age of 55.

The annual normal retirement benefit is 2 percent of the average of the member's highest three years' base salary for each year of credited service up to ten years, plus 2.5 percent for each year of service thereafter. The benefit earned prior to January 1, 2007 for members of affiliated Social Security employers will be reduced by the amount of Social Security income payable to the member annually. Effective January 1, 2007, members currently covered under Social Security will receive half the benefit when compared to the SWDB Plan. Benefits paid to retired members are evaluated and may be re-determined every October 1. The amount of any increase is based on the Board's discretion and can range from 0 to the higher of 3 percent or the Consumer Price Index.

A member is eligible for an early retirement at age 50 or after 30 years of service. The early retirement benefit equals the normal retirement benefit reduced on an actuarially equivalent basis. Upon termination, an employee may elect to have member contributions, along with 5 percent as interest, returned as a lump sum distribution. Alternatively, a member with at least five years of accredited service may leave contributions with the SWDB Plan and remain eligible for a retirement pension at age 55 equal to 2 percent of the member's average highest three years' base salary for each year of credited service up to ten years, plus 2.5 percent for each year of service thereafter.

The SWDB Plan sets contribution rates at a level that enables all benefits to be fully funded at the retirement date of all members. Contribution rates for the SWDB Plan are set by state statute. Employer contribution rates can only be amended by state statute. Member contribution rates can be amended by state statute or election of the membership.

Members of the SWDB Plan and their employers are contributing at the rate of 8.5 percent and 8 percent, respectively, of base salary for a total contribution rate of 16.5 percent in 2015. In 2014, the members elected to increase the member contribution rate to the SWDB Plan beginning in 2015. Member contribution rates will increase 0.5 percent annually through 2022 to a total of 12 percent of base salary. Employer contributions will remain at 8 percent resulting in a combined contribution rate of 20 percent in 2022.

At December 31, 2015, the total pension liability for the SWDB Plan was \$1,846,961,999, the plan fiduciary net position was \$1,848,724,853, the net pension asset was \$1,762,854, and the plan fiduciary net position as a percentage of the total pension liability was 100.10%.

At December 31, 2015, the District's proportion of the net pension asset of the SWDB Plan was 0.1151 percent, which was an increase of 0.0112 percent from its proportion measured as of December 31, 2014.

At December 31, 2016, the District reported a net asset of \$2,029 for its proportionate share of the SWDB Plan net pension asset. The net pension asset was measured as of December 31, 2015. The collective total pension liability used to calculate the net pension asset was determined by an actuarial valuation as of January 1, 2016. The actuarially determined contributions as of December 31, 2015 are based on the January 1, 2015 actuarial valuation. For the year ended December 31, 2016, the District recognized pension expense of \$30,948 related to the SWDB Plan.

Employer contributions recognized by the SWDB Plan from the District were \$48,785 for the year ended December 31, 2016.

At December 31, 2016, the District reported deferred outflows of resources and deferred inflows of resources related to the SWDB Plan from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Net difference between projected and actual investment earnings	\$ 103,262	\$ -
Changes in assumptions	31,869	-
Difference between actual and expected experience	16,409	2,395
Total	\$ 151,540	\$ 2,395

The deferred outflows of resources and deferred inflows of resources related to pensions are included with total deferred outflows of resources and total deferred inflows of resources on the statement of net position. Deferred outflows of resources of \$48,785 related to FPPA pensions, resulting from contributions subsequent to the measurement date, will be recognized as a reduction of the FPPA net pension liability in the year ending December 31, 2017. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

For the years ending December 31,	Amounts Recognized in Pension Expense
2016	\$ 31,420
2017	\$ 31,420
2018	\$ 31,420
2019	\$ 28,860
2020	\$ 4,963
Thereafter	\$ 21,062
Total	\$ 149,145

The actuarial valuations for the SWDB Plan were used to determine the total pension liability and actuarially determined contributions for the fiscal year ended December 31, 2015. The valuation used the following actuarial assumption and other inputs:

	<u>Total Pension Liability</u>	<u>Actuarially Determined Contributions</u>
Actuarial Valuation Date	January 1, 2016	January 1, 2015
Actuarial Method	Entry Age Normal	Entry Age Normal
Amortization Method	Level % of Payroll, Open	Level % of Payroll, Open
Amortization Period	30 Years	30 Years
Long-term Investment Rate of Return*	7.5%	7.5%
Projected Salary Increases*	4.0% - 14.0%	4.0% - 14.0%
Cost of Living Adjustments (COLA)	0.0%	0.0%
*Includes Inflation at	2.5%	3.0%

For determining the total pension liability of the SWDB Plan, the RP-2014 Mortality Tables for Blue Collar Employees, projected with Scale BB, 55 percent multiplier for off-duty mortality is used in the valuation for off-duty mortality of active members. On-duty related mortality is assumed to be 0.00020 per year for all members. The RP-2014 Mortality Tables for Blue Collar Employees, projected with Scale BB is used in the projection of post-retirement benefits for members under age 55. For post-retirement members ages 65 and older, the RP-2014 Mortality Tables for Blue Collar Healthy Annuitants, projected with Scale BB are used. For post-retirement members ages 55 through 64, a blend of the previous tables is used.

For determining the actuarially determined contributions, the RP-2000 Combined Mortality Table with Blue Collar Adjustment, projected with Scale AA, 40 percent multiplier for off-duty mortality is used in the valuation for off-duty mortality of active members. On-duty related mortality is assumed to be 0.00020 per year for all members. The RP-2000 Combined Mortality Table with Blue Collar Adjustment, projected with Scale AA is used in the projection of post-retirement benefits.

At least every five years the FPPA's Board, in accordance with best practices, reviews its economic and demographic actuarial assumptions. At its July 2015 meeting, the Board reviewed and approved recommended changes to the actuarial assumptions. The recommendations were made by the FPPA's actuaries, Gabriel, Roeder, Smith & Co., based upon their analysis of past experience and expectations of the future. The assumption changes were effective for actuarial valuations beginning January 1, 2016 and were used in the rollforward calculation of total pension liability as of December 31, 2015. The actuarial assumptions impact actuarial factors for benefit purposes such as purchases of service credit and other benefits where actuarial factors are used.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Fund's target asset allocation as of December 31, 2015, are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Rate of Return
Global Equity	37.0%	6.5%
Equity Long/Short	10.0%	4.7%
Illiquid Alternatives	20.0%	8.0%
Fixed Income	16.0%	1.5%
Absolute Return	11.0%	4.1%
Managed Futures	4.0%	3.0%
Cash	2.0%	0.0%*
Total	100.0%	

*While the expected inflation exceeds the expected rate of return for cash, a 0.0 percent real rate of return is utilized.

Discount rate. The discount rate used to measure the total pension asset was 7.50 percent. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the Board's funding policy, which establishes the contractually required rates under Colorado statutes. Based on those assumptions, the SWDB Plan fiduciary net position was projected to be available to make all the projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Projected benefit payments are required to be discounted to their actuarial present values using a Single Discount Rate that reflects (1) a long-term expected rate of return on pension plan investments (to the extent that the plan's fiduciary net position is projected to be sufficient to pay benefits) and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the plan's projected fiduciary net position is not sufficient to pay benefits).

For the purpose of this valuation, the expected rate of return on pension plan investments is 7.50%; the municipal bond rate is 3.57% (based on the weekly rate closest to but not later than the measurement date of the "state & local bonds" rate from Federal Reserve statistical release (H.15)), and the resulting Single Discount Rate is 7.50%.

Sensitivity of the District's proportionate share of the net pension liability to changes in the discount rate. Regarding the sensitivity of the District's net pension asset to changes in the Single Discount Rate, the following presents the net pension asset, calculated using a Single Discount Rate of 7.50%, as well as what the District's net pension asset would be if it were calculated using a Single Discount Rate that is one percent lower or one percent higher:

	1% Decrease (6.50%)	Current Discount Rate (7.50%)	1% Increase (8.50%)
Proportionate share of the net pension asset (liability)	\$(284,239)	\$2,029	\$239,479

Pension plan fiduciary net position. Detailed information about the SWDB's fiduciary net position is available in FPPA's comprehensive annual financial report which can be obtained at www.coFPPA.org/investments/FPPA-financial-reports.

Volunteer Firefighters

The FPPA administers an agent multiple-employer Public Employee Retirement System (PERS). The PERS represents the assets of numerous separate plans that have been pooled for investment purposes. The pension plans have elected to affiliate with FPPA for plan administration and investment only. FPPA

issues a publicly available comprehensive annual financial report that can be obtained at FPPAco.org. Once in the site, locate the site map at the bottom of the web page and you will find the 'Annual Report' link.

The District is trustee of a single-employer defined benefit pension plan for all volunteer firefighters (Volunteer Plan). The Volunteer Plan is administered by the FPPA. The Volunteer Plan's Board of Trustees is comprised of the District's Board and firefighters in accordance with Colorado statutes.

The Volunteer Plan provides normal retirement benefits, disability retirement and survivor benefits. Fully vested firefighters receive the maximum benefit in an amount reviewed every other year during the actuarial review process. Firefighters who have attained both 50 years of age and completed 20 years of active service in any fire department in the State of Colorado are fully vested and are eligible for a normal retirement benefit. Firefighters with 10 to 20 years of service are also eligible for a reduced monthly benefit based off an amount per year of service that is also reviewed every other year during the actuarial review process. Upon death, the surviving spouse receives a monthly pension equal to 50% of the benefit previously received, payable until death or remarriage. The District has thirty-eight retirees, including beneficiaries, three inactive members, and sixty-one active members in the Volunteer Plan as of January 1, 2015, the actuarial valuation date.

At December 31, 2016, the District reported a net pension liability of \$863,839 related to the Volunteer Plan. The net pension liability was measured as of December 31, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of January 1, 2015. Standard update procedures were used to roll forward the total pension liability to December 31, 2016.

At December 31, 2016 the total pension liability was \$2,704,918 and the plan fiduciary net position was \$1,841,079. For the year ended December 31, 2016, the District recognized pension expense of \$46,781 related to the Volunteer Plan.

At December 31, 2016, the District reported deferred outflows of resources and deferred inflows of resources related to the Volunteer Plan from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 43,214	\$ -
Net difference between expected and actual earnings on pension plan investments	93,925	-
Total	\$ 137,139	\$ -

The deferred outflows of resources and deferred inflows of resources related to the Volunteer Plan are included with total deferred outflows of resources and total deferred inflows of resources on the statement of net position.

Deferred outflows of resources of \$123,000 related to the Volunteer Plan, resulting from contributions subsequent to the measurement date of December 31, 2015 will be recognized as a reduction of the net pension liability in the year ending December 31, 2017. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

For the years ending December 31,	
2017	\$ 44,782
2018	\$ 44,782
2019	\$ 26,953
2020	\$ 20,622
2021	\$ -
Thereafter	\$ -
Total	\$ 137,139

Employer contributions are recognized by FPPA in the period in which the compensation becomes payable to the member and the District is statutorily committed to pay the contributions to FPPA. Employer contributions recognized by the FPPA from the District were \$123,000 for the year ended December 31, 2016.

Actuarially determined contribution rates are calculated as of January 1 of odd numbered years. The contributions rates have a one-year lag, so the actuarial valuation as of January 1, 2013, determines the contribution amounts for 2014 and 2015. The actuarial valuation as of January 1, 2015 determines the contribution amounts for 2016 and 2017. Methods and assumptions used to determine contribution rates for the year ended December 31, 2015 were as follows:

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Dollar, Open*
Remaining Amortization Period	20 Years*
Asset Valuation Method	5-Year smoothed fair value
Inflation	3.00%
Salary Increases	N/A
Investment Rate of Return	7.50%
Retirement Age	50% per year of eligibility until 100% at age 65.
Mortality	Pre-retirement: RP-2000 Combined Mortality Table with Blue Collar Adjustment, 40% multiplier for off-duty mortality; Post-retirement: RP-2000 Combined Mortality Table, with Blue Collar Adjustment; Disabled: RP-2000 Disabled Mortality Table; All tables projected with Scale AA

* Plans that are heavily weighted with retiree liabilities use an amortization period based on the expected remaining lifetime of the participants.

Assumption changes. The assumptions shown above pertain to the actuarial valuation as of January 1, 2013 and the associated actuarially determined contribution for the year ending December 31, 2015. Following a regularly scheduled experience study in 2015, the Board adopted a new assumption set for use in the January 1, 2016 valuations. Due to the biennial valuation process, the new assumptions will first apply to the January 1, 2017 Volunteer Plan valuations.

The primary changes, which can be observed in the January 1, 2017 valuation, as compared to the assumptions shown are as follows:

Inflation	2.50%
Mortality	Pre-retirement: RP-2014 Mortality Tables for Blue Collar Employees, projected with Scale BB, 55% multiplier for off-duty mortality. Increased by 0.00020 for on-duty related Fire and Police experience. Post-retirement: For ages less than 55, RP-2014 Mortality Tables for Blue Collar Employees. For ages 65 and older, RP-2014 Mortality Tables of Blue Collar Healthy Annuitants. For ages 55 through 64, a blend of the previous tables. All tables are projected with Scale BB. Disabled: RP-2014 Disabled Generational Mortality Table generationally projected with Scale BB with a minimum 3% rate for males and 2% rate for females.

Development of the single discount rate. The discount rate used to measure the total pension liability was 7.50 percent. The long term expected rate of investment return was 7.50 percent. The long term municipal bond rate was 3.57 percent. This rate is from the Federal Reserve statistical release (H.15) as of December 31, 2015. The statistical release describes this rate as “Bond Buyer Index, general obligation, 20 years to maturity, mixed quality.” In describing this index, the Bond Buyer notes that the bonds’ average credit quality is roughly equivalent to Moody’s Investors Service Aa2 rating and Standard & Poor’s Corp.’s AA. The last year ending December 31 in the 2016 to 2115 projection period for which projected benefit payments are fully funded in 2115.

Long-term expected return on plan assets. The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Fund’s target asset allocation as of December 31, 2015 are summarized in the following table:

Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Global Equity	37.00%	6.50%
Equity Long/Short	10.00%	4.70%
Illiquid Alternatives	20.00%	8.00%
Fixed Income	16.00%	1.50%
Absolute Return	11.00%	4.10%
Managed Futures	4.00%	3.00%
Cash	2.00%	0.00% *
Total	100.00%	

*While expected inflation exceeds the expected rate of return for cash, a 0.0% real rate of return is utilized.

Sensitivity of the District’s proportionate share of the net pension liability to changes in the discount rate. The following presents the proportionate share of the net pension liability calculated using the discount rate of 7.50 percent, as well as what the proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.50 percent) or 1-percentage-point higher (8.50 percent) than the current rate:

	1% Decrease (6.50%)	Current Discount Rate (7.50%)	1% Increase (8.50%)
Proportionate share of the net pension liability	\$1,139,712	\$863,839	\$629,435

Deferred Compensation Retirement Plan

Plan Description: The District offers its employees a deferred compensation plan (the Compensation Plan), created in accordance with Internal Revenue Code Section 457, administered by the FPPA. The Compensation Plan, available to all District employees, permits them to defer a portion of their salary until future years. The deferred compensation is not available to employees until termination, retirement, death, or an unforeseeable emergency.

All property and rights purchased with those amounts, and all income attributable to those amounts, property, or rights are (until paid or made available to the employee or other beneficiary) held in the Compensation Plan trusts for the exclusive benefit of participants and their beneficiaries. FPPA is trustee of the trusts. The District has no ownership interest in the Compensation Plan nor is the District liable for losses under the Compensation Plan.

NOTE 9 - RISK MANAGEMENT

The District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; injuries to employees; and natural disasters. These risks are covered by commercial insurance purchased from independent third parties. Settled claims have not exceeded this commercial coverage in any of the past three years.

NOTE 10 - SUBSEQUENT EVENTS

The District has evaluated subsequent events through June 20, 2017, the date at which the financial statements were available to be issued. Subsequent to year-end, the District incurred approximately \$1.4 million in capital outlay expenditures for the purchase of two new vehicles. The District also traded an existing vehicle along with \$50,000 cash to acquire a new vehicle.
