INDEPENDENT AUDITOR'S REPORT

To the Town Council
Town of Norwood, Colorado

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of Town of Norwood, Colorado (the Town), as of and for the year ended December 31, 2017, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Norwood, Colorado, as of December 31, 2017, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information on pages 3 through 10 and 33 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Town's basic financial statements. The combining and individual fund financial statements and Local Highway Finance Report are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual fund financial statements and Local Highway Finance Report are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual fund financial statements and Local Highway Finance Report are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

TOWN OF NORWOOD
Management's Discussion and Analysis
Fiscal Year Ended December 31, 2017

As management of the Town of Norwood (the "Town"), we offer readers of the Town's basic financial statements this narrative overview and analysis of the financial activities of the Town for the fiscal year ended December 31, 2017. We encourage readers to consider the information presented here in conjunction with additional information provided in the financial statements.

FINANCIAL HIGHLIGHTS

- The Town's assets exceeded its liabilities and deferred inflows of resources by \$ 5,503,449 (i.e. net position) as of December 31, 2017 an increase of \$ 419,008 in comparison to the prior year.
- Governmental funds reported combined ending fund balances of \$ 990,600, decrease of \$ 87,438 in comparison with the prior year.
- The Town's fund balance for the General Fund was \$ 106,282, decrease of \$ 88,917 in comparison to the prior year.
- Total long-term liabilities decreased by \$ 56,265 during the 2017 fiscal year with no new debt issued.
- General property tax, sales tax, and other tax totaled \$ 336,712, or 61% of general revenues.

OVERVIEW OF FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Town's basic financial statements. The basic statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements.

Government-wide Financial Statements

The government-wide financial statements are designed to provide readers with a broad overview of the Town's finances in a manner similar to a private-sector business.

The **statement of net position** presents information on all the Town's assets, liabilities and deferred inflows of resources, with the difference being reported as net position. Over time, the increases or decreases in net position may serve as a useful indicator of whether the financial position of the Town is improving or deteriorating.

The **statement of activities** presents information showing how the Town's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, *regardless of the timing of related cash flows*. Thus, revenues and expenses reported in this statement for some items will result in cash flows in future periods (e.g. uncollected taxes and earned but unused personal time).

The government-wide financial statements distinguish functions of the Town that are principally supported by taxes and intergovernmental revenues (*Governmental Activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*Business-type Activities*). The Governmental Activities of the Town include general government administration, police, fire, public works, and community center. The Business-type Activities of the Town include a water fund.

Fund Financial Statements

A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. Fund accounting is used to ensure and demonstrate compliance with finance-related legal requirements. The Town's funds can be divided into two categories: Governmental Funds and Proprietary Funds.

Governmental Funds – *Governmental funds* are used to account for essentially the same functions reported as *governmental activities* in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *short-term inflows and outflows of spendable resources*, as well as on *balances of spendable resources* available at the end of the fiscal year. Such information may be useful in evaluating a government's short-term financing requirements. The accounting method is called *modified accrual* accounting.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental activities in the *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's short-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The Town maintains one major government fund, the General Fund. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the general fund.

Proprietary Funds – The Town maintains one type of proprietary fund. *Enterprise Funds* are used to report the same functions presented as *business-type activities* in the government-wide financial statements. The Town uses a separate enterprise funds to account for its utility funds: Water and Raw Water Irrigation System Funds.

Notes to Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the financial statements.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Net Position

As noted previously, net position may serve over time as a useful indicator of the Town's financial position. For the year ended December 31, 2017, the Town's combined assets exceed liabilities and deferred inflows of resources by \$ 5,503,449. Of this amount, \$ 1,164,138 is unrestricted and available to meet the Town's ongoing financial obligations.

By far the largest portion of net assets is the investment in capital assets (net of related debt) of \$ 3,518,893 (64% of net position). This amount reflects the investment in all capital assets (e.g. infrastructure, land, buildings, and equipment) less any related debt used to acquire those assets that are still outstanding. These capital assets are used to provide services to citizens; consequently, these assets are not available for future spending. Although the investment in capital assets is reported net of debt, it should be noted that the resources needed to repay this debt must be provided from other sources since capital assets themselves cannot be used to liquidate these liabilities.

The following table summarizes the Town's governmental and business-type net assets for 2017 and 2016:

	Governmental Activities		Business-Type Activities		Total	
	2017	2016	2017	2016	2017	2016
Assets						
Current and other assets	\$ 992,699	\$ 1,083,485	\$ 1,104,845	\$ 717,371	\$ 2,097,544	\$ 1,800,856

Governmental Activities

Governmental activities decreased the Town's net position by \$ 73,442.

Revenues by Source-Governmental Activities

Expenses by Department-Governmental Activities

Business-type Activities

Business-type activities for the year resulted an increase in net position of \$ 492,450. Charges for services accounted for 75% of total revenues.

FINANCIAL ANALYSIS OF GOVERNMENT'S FUNDS

Governmental funds - The focus of the Town's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the Town's financing requirements. In particular, unreserved fund balance may serve as a useful measure of the Town's net resources available for spending at the end of the fiscal year.

As of the end of 2017, the Town's governmental funds reported combined ending fund balances of \$ 902,600, decrease of \$ 87,438 in comparison with the prior year. Of the combined ending fund balances for all governmental funds 9% of this total amount, \$ 82,182, constitutes unreserved fund balance, which is available for appropriation at the Town's discretion. The remainder of the fund balance is reserved to indicate that it is not available for new spending because it is already committed to meet a State constitution mandated emergency reserve, \$ 24,100, restricted for parks and recreation \$39,930 and \$ 756,388 for other purposes.

The Town has one major governmental fund, the General Fund, which is the primary operating fund for the Town. At the end of 2017, unreserved fund balance of the General Fund was \$ 82,182, while the total fund balance was \$ 106,282. As a measure of the General Fund's liquidity, it may be useful to compare both unreserved fund balance and total fund balance to total fund expenditures. The fund balance of the Town's General Fund decreased by \$ 88,917 during 2017.

Proprietary funds - The Town's proprietary fund statements provide the same type of information found in the government-wide financial statements, but in more detail.

The Town has one enterprise fund: Water Fund. At the end of 2017, the fund represented the following net position amounts:

Fund:	Water	Raw Water Irrigation System
Unrestricted net position	\$ 577,500	\$ 504,456
Total net position	\$ 3,008,780	\$ 504,456
Increase or (decrease) in net position	\$ (12,006)	\$ 504,456

GENERAL FUND BUDGETARY HIGHLIGHTS

The Town budgeted \$ 745,472 for 2017 expenditures. Actual expenditures were \$ 704,076. There was no amendment to the original budget for General Fund.

CAPITAL ASSET AND DEBT ADMINISTRATION

The Town's investment in capital assets for its governmental and business-type activities as of December 31, 2017, was \$ 3,982,839. As required by GASB 34, the investment in capital assets includes land, buildings, building improvements, and equipment.

Totals	\$ 520,212	\$ -	\$ (56,265)	\$ 463,947	\$ 58,737

ECONOMIC FACTORS AND NEXT YEAR'S BUDGET AND RATES

- The Town of Norwood is in good financial condition.
- The Town's CD has a fund balance that will cover twelve months of the normal expenditures.
- The service levels for Building Inspection, Community Center and Park is budgeted to remain the same. The streets budget has decreased due to the lower fuel costs and wages of entry level employees.
- The capital Improvement plan for 2018 is to continue to resurface the streets systematically and improve drainage on our streets and alleys.
- The Town of Norwood added a Reserve Officer and anticipates adding a part-time position to the Marshal's Department which provides protective services to ensure the health, safety and welfare of our community.
- The Town Board continues to actively work toward replacement of equipment for the Public Works Department
- The Town of Norwood continues to budget for donations to various non-profit organizations providing services to the citizens of our community.
- The Town of Norwood and Norwood Water Commission have completed a feasibility study regarding a Raw Water Irrigation System and continue to work to find funding for the installation of the RWS.
- The Norwood Water Commission has rehabilitated two of its water rights for continued delivery to the Reservoir #1.
- Norwood Water Commission completed a hazard assessment for Reservoir #1 and dam classification for the State.
- The Capital Improvement Plan for Norwood Water Commission will be to continue to upgrade transmission and service lines in 2018.

Request for Information:

This financial report is designed to provide a general overview of the Town's finances for all those with an interesting the government's finances. Questions concerning any of the information provided in the report or requests for additional financial information should be addressed to:

Town of Norwood
Notes to the Financial Statements
December 31, 2017

Note 1 – Summary of Significant Accounting Policies

The financial statements of the Town of Norwood, Colorado (the Town) have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles.

The more significant of the Town's accounting policies are described below:

A. Financial Reporting Entity

The Town is a statutory municipality with a mayor – council form of government with five elected Council members. As required by accounting principles generally accepted in the United States of America, these financial statements present the Town of Norwood (the primary government). The Town has no oversight responsibility for any other governmental entity since no other entities are considered to be controlled by or dependent on the Town. Control or dependence is determined on the basis of budget adoption, taxing authority, funding, and appointment of the respect governing body.

B. Government-wide Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of changes in net position) report information on all of the activities of the Town. For the most part, the effect of inter-fund activity has been removed from these statements. Governmental activities, which normally are supported by taxes, charges for services and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on user charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to those who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

C. Fund Financial Statements

The accounts of the Town are organized on the basis of funds and account groups, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues, and expenditures, or expenses, as appropriate. Government resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled.

All governmental funds are accounted for on a flow of current financial resources basis. Balance sheets for these funds generally include only current assets and current liabilities. Reported fund balances are considered a measure of available, spendable resources. Operating statements for these funds present a summary of available, spendable resources and expenditures for the period.

Town of Norwood
Notes to the Financial Statements
December 31, 2017

Note 1 – Summary of Significant Accounting Policies – (continued)

C. Fund Financial Statements – (continued)

Separate financial statements are provided for governmental funds and proprietary funds. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

The Town reports the following major governmental funds:

- The General Fund is the Town's primary operating fund. It accounts for all financial resources of the Town, except those required to be accounted for in another fund.

The remaining governmental funds are aggregated and presented as non-major funds. Those funds include:

- The Conservation Trust Fund, which accounts for State of Colorado lottery funds to be used for parks and recreation services and capital investment.
- Contingency Fund, which accounts for expenditures that could not have been reasonably foreseen.

Enterprise Funds account for operations that are financed and operated in a manner similar to private business enterprises, where the intent is that the costs of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges. Enterprise funds are considered major funds because of community interests in the activities and sources of funding supporting these operations.

Enterprise funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with an enterprise fund's principal ongoing operations. The principal operating revenues of the Town are charges for water fees. Operating expenses for the enterprise funds include purchased services, utilities, repairs and maintenance, supplies, insurance and depreciation cost. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses. When both restricted and unrestricted resources are available for use, it is the Town's policy to use restricted resources first, then unrestricted resources as needed.

The Town reports the following major enterprise fund business-type activity:

- Water Fund, which account for all operations of the Town's water services. This is primarily financed by user charges.
- Raw Water Irrigation System Fund, which account for all operations of the Town's raw water irrigation services. This is primarily financed by grants and contributions and by user charges.

D. Measurement Focus and Basis of Accounting

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the enterprise fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Town of Norwood
Notes to the Financial Statements
December 31, 2017

Note 1 – Summary of Significant Accounting Policies – (continued)

D. Measurement Focus and Basis of Accounting – (continued)

The modified accrual basis of accounting is used by all governmental funds. Under the modified accrual basis of accounting, revenues are recognized when susceptible to accrual (i.e., when they become both measurable and available). “Measurable” means the amount of the transaction can be determined and “available” means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days at the end of the current fiscal period. Expenditures are recorded when the related fund liability is incurred. Exceptions to this general rule include principal and interest on general long-term debt which is recognized when due, and compensated absences which are recognized when the obligations are expected to be liquidated with expendable available resources.

Those revenues susceptible to accrual are interest revenue and charges for services. Entitlement revenues are not susceptible to accrual because generally, they are not measurable until received. Grant revenues are recognized as they are earned.

The accrual basis of accounting is utilized by enterprise funds. Under this method, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred.

Deferred Outflows / Inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section of deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and will not be recognized as an outflow of resources (expense/ expenditure) until then.

In addition to liabilities, the statement of net position will sometimes report a separate section of deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and will not be recognized as an inflow of resources (revenue) until that time. Property taxes revenue that are related to a future period have been recorded as deferred inflows. Grants and entitlements received before eligibility requirements are met (e.g., cash advances) are recorded as deferred inflows. These amounts are deferred and will be recognized as an inflow of resources in the period that the amounts become available.

E. Cash and Cash Equivalents

For the purposes of the statement of cash flows of the enterprise funds, cash and cash equivalents consist of operating and restricted cash and highly liquid securities with an initial maturity of three months or less.

Town of Norwood
Notes to the Financial Statements
December 31, 2017

Note 1 – Summary of Significant Accounting Policies – (continued)

F. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

G. Property Taxes

Property taxes for the current year are levied and attach as a lien on property the following January 1. They are payable in full by April 30 or in two equal installments due February 28 and June 15. Property taxes levied in the current year and collected in the following year are reported as a receivable at December 31. However, since the taxes are not available to pay current liabilities, the receivable is recorded as deferred inflows of resources in the governmental and enterprise funds.

H. Capital Assets

Capital assets, which include property, equipment and infrastructure assets, are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capitalized assets are defined by the Town as assets that have a useful life of one or more years, and for which the initial, individual value equals or exceeds \$ 5,000.

All purchased assets are valued at cost where historical records are available and at an estimated historical costs where no historical records exist. Donated assets are valued at their estimated fair market value on the date received. The cost of normal maintenance and repairs that does not add to the value of an asset or materially extend asset life is not capitalized.

Depreciation on all assets is provided on the straight-line basis over the following estimated useful lives:

<u>Asset Class</u>	<u>Useful Life</u>
Utility Plant and System	50 years
Machinery and Equipment	5-10 years
Infrastructure assets	15-40 years

Public domain assets consisting of roads, bridges, curbs and gutters, streets and sidewalks, drainage systems and lighting systems are examples of infrastructure assets. Infrastructure assets are distinguished from other capitalized assets as their useful life often extends beyond most other capital assets and are stationary in nature. General infrastructure assets are those associated with or arising from governmental activities.

Under GASB 34 the town is not required to retroactively report on infrastructure assets before June 30, 2004. Therefore, infrastructure assets before that date are not shown on the financial statements.

Town of Norwood
Notes to the Financial Statements
December 31, 2017

Note 1 – Summary of Significant Accounting Policies – (continued)

I. Long-Term Liabilities

In the government-wide financial statements, and enterprise fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable government activities, business-type activities, or enterprise fund type statement of net assets.

The long-term compensated absences are serviced from revenues of the General Fund from future appropriations.

J. Compensated Absences

A total of 10 days vacation and 5 days of personal leave per year may be accrued by each employee. Employees are paid for the accumulated vacation leave upon retirement or other termination. Employees are encouraged to use accumulated vacation by the end of each year and are not allowed to accumulate more than 15 days. Personal leave is not paid upon retirement. Accrued compensated absences amount are immaterial to the financial statements and are not presented.

K. Net Position

Net position represents the difference between assets, deferred outflows of resources, liabilities and deferred inflows of resources. Net position invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition or construction of improvements on those assets. Net position is reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the Town or through external restrictions imposed by creditors, grantors, laws or regulations of other governments.

L. Interfund Transactions

Interfund receivables and payables arise from interfund transactions and are recorded by all funds affected in the period in which transactions are executed. At year end, outstanding balances between funds are reported as “due to/from other funds.” Nonrecurring or nonroutine permanent transfers of equity are reported as residual equity transfers. All other interfund transfers are reported as operating transfers. Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as “internal balances.”

M. Encumbrances

The Town does not use an encumbrance system for budgetary control.

N. Accounts Receivable

The Town considers accounts receivable for the water fund to be fully collectible because the Town can place liens on the individual properties; accordingly, no allowance for doubtful accounts is required. If amounts become uncollectible, they will be charged to operations when that determination is made.

Town of Norwood
Notes to the Financial Statements
December 31, 2017

Note 1 – Summary of Significant Accounting Policies – (continued)

O. Fund Equity

In the fund financial statements, governmental funds report the following classifications of fund balance:

- Non-spendable fund balance-amounts that are not in spendable form (such as inventory) or are required to be maintained intact;
- Restricted fund balance-amounts constrained to specific purposes by their providers (such as grantors, bondholders, and higher levels of government), through constitutional provisions or by enabling legislation;
- Committed fund balance-amounts constrained to specific purposes by a government itself, using its highest level of decision-making authority; to be reported as committed, amounts cannot be used for any other purpose unless the government takes the same highest level action to remove or change the constraint;
- Assigned fund balance-amounts a government intends to use for a specific purpose; intent can be expressed by the governing body or by an official or body to which the governing body delegates the authority;
- Unassigned fund balance-amounts that are available for any purpose; positive amounts are reported only in the general fund.

When an expenditure is incurred for purposes for which both restricted and unrestricted fund balance is available, the Town considers restricted funds to have been spent first. When an expenditure is incurred for which committed, assigned, or unassigned fund balances are available, the Town considers amounts to have been spent first out of committed funds, then assigned funds, and finally unassigned funds, as needed, unless Town Council has provided otherwise in its commitment or assignment actions.

Note 2 – Reconciliation of Government-wide and Fund Financial Statements

The governmental funds balance sheet includes reconciliation between fund balances total governmental funds and net position - governmental activities as reported in the government-wide statement of net position. Additionally, the governmental fund statement of revenues, expenditures, and changes in fund balances includes reconciliation between net change in fund balances - total governmental funds and changes in net position of governmental activities as reported in the government-wide statement of activities. The enterprise fund statement of net position and statement of revenues, expenses and changes in net position also includes reconciliation to the government-wide statement of net position and activities.

These reconciliations detail items that require adjustment to convert from the current resources measurement and modified accrual basis for governmental fund statements to the economic resources measurement and full accrual basis used for government-wide statements. However, certain items having no effect on measurement and basis of accounting were eliminated from the governmental fund statements during the consolidation of governmental activities.

Town of Norwood
Notes to the Financial Statements
December 31, 2017

Note 3 – Tax, Spending and Debt Limitations

Colorado voters passed an amendment to the State Constitution, Article X, Section 20, which has several limitations, including revenue raising, spending abilities, and other specific requirements of state and local governments. The amendment is complex and subject to judicial interpretation. However, the Town had made certain interpretations of the amendment's language in order to determine its compliance.

On the November 8, 1994 municipal election ballot, the voters authorized the Town, without any increase in the Town's Current tax mill levy rate of 15.129 mills or any increase in the Town's current sales tax and use tax rate of 2.0%, except by prior voter approval, to be authorized to generate, collect and retain all revenues from and in fiscal year 1993 and subsequent years and increase fiscal year spending up to the amount of such revenues generated and collected without limitation under Article X, Section 20, Colorado Constitution, or any other law, and without limiting in any year the amount of all lawful sources of Town revenues that may be collected and spent by the Town of Norwood for street improvements and maintenance, capital improvements and construction, and all other lawfully authorized municipal; purposes, including but not limited to property taxes at current level of 15.129 mills, sales and use tax of 2.0%, and any state, federal or other grants; provided that such voter-approved revenue change for fiscal year 1993 shall be in the amount of \$ 10,000.

Note 4 – Budgets

The Town adheres to the following procedures in establishing budgetary data reflected in the financial statements:

- A. By October of each year, the Finance Officer gives public notice of the budget calendar for the next fiscal year. The Finance Officer asks that all Town departments, boards, commissions or citizens submit within thirty days from the notice, any request for funds under the budget being prepared. The Finance Officer then prepares a proposed budget for the ensuing fiscal year and submits it to the Council no later than forty-five days prior to any date required by state law for the certification to the County of the tax levy.
- B. The budget provides a complete financial plan of all Town funds and activities for the ensuing fiscal year indicating anticipated revenues, proposed operating and capital expenditures, a provision for contingencies, and anticipated net surplus or deficit for the ensuing fiscal year.
- C. A public hearing on the proposed budget is held by the Council in early December.
- D. The Council adopts the budget by resolution on or before the final day established by law for the certification of the ensuing year's tax levy to the County. Adoption of the budget by the Council shall constitute appropriations of the amounts specified therein as expenditures from the funds indicated and shall constitute a levy of the property tax therein proposed.
- E. If during the fiscal year the Finance Officer determines that there are expenses in excess of those estimated in the budget, the Council by resolution may make supplemental appropriations for the year up to the amount of such excess. To meet an emergency affecting public property, health, peace or safety, the Council may make emergency appropriations. If at any time during the fiscal year it appears probable to the Finance Officer that the revenues available will be insufficient to meet the amount appropriated, the Finance Officer reports to the Council, indicating the estimated amount of deficit, any remedial action already taken, and a recommendation as to any other steps to be taken. Any time during the fiscal year the Finance Officer may transfer part or all of any unencumbered appropriation balance within a department.

Town of Norwood
Notes to the Financial Statements
December 31, 2017

Note 4 – Budgets – (continued)

- F. Budget appropriations lapse at the end of each year.
- G. Expenditures may not exceed appropriations at the fund level. Budget amounts included in the financial statements are based on the final amended budget. No revisions were made to the original budget.
- H. Budgets for governmental funds are adopted on a basis consistent with accounting principles generally accepted in the United States of America (GAAP), except for long-term receivables and advances and capital lease financing which are budgeted when liquidated rather than when the receivable/liability is incurred. Budgets for enterprise funds are adopted on a basis consistent with the spending measurement focus of the governmental funds. There was no budget for 2017 for the Raw Water Irrigation System Fund.

Note 5 – Deposits and Investments

The Colorado Public Deposit Protection Act (PDPA) requires that all units of local government deposit cash in eligible public depositories; eligibility is determined by state regulators. Amounts on deposit in excess of federal insurance levels must be collateralized. The eligible collateral is determined by the PDPA. PDPA allows the institution to create a single collateral pool for all public funds. The pool is to be maintained by another institution or held in trust for all the uninsured public deposits as a group. The market value of the collateral must be at least equal to the aggregate uninsured deposits. Collateral in the pool is considered to be equal to depository insurance pursuant to definitions listed in GASB Statement No. 40. At December 31, 2017, the bank balance of the Town's deposits was \$1,855,328 of which \$500,000 was covered by federal depository insurance and \$1,355,328 was collateralized under PDPA.

The composition of all cash and cash investments held by the Town at December 31, 2017 is as follows

Cash on hand and with the County Treasurer	\$ 655
Cash in bank and savings accounts	<u>1,821,066</u>
Total cash and investments	<u>\$ 1,821,721</u>

Interest rate risk-The town does not have a formal policy limiting investment maturities, other than that established by the state statute of five years, which would help manage its exposure to fair value losses from increasing interest rates.

Credit risk-Credit risk is the risk that the issuer or other counterparty to an investment will not fulfill its obligations. It is the Town's policy to limit its investments to U.S. Treasury obligations, certain U.S. government agencies securities, commercial paper, local government investment pools, repurchase agreements and money market funds.

Custodial Credit Risk- For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, the Town will not be able to recover the value of its investment or collateral securities that are in the possession of an outside party.

Total	<u>\$ 41,875</u>	<u>\$ 6,485</u>	<u>\$ 48,360</u>

Town of Norwood
Notes to the Financial Statements
December 31, 2017

Note 6 – Long-Term Liabilities – (continued)

Note Payable- CWCB - The Town obtained loans from the Colorado Water Conservation Board (CWCB) in the amount of \$950,000, to build a 92 acre-foot reservoir. The remaining loan of \$630,000 will be at an annual interest rate of 4% over 40 years at \$ 31,830 with an additional payment of \$19,570. The first payments are due January 1, 1998, and are due annually on the first of each year. The following is the annual maturities for the years subsequent to 2017:

Year	Principal	Interest	Total
2018	\$ 35,461	\$ 15,939	\$ 51,400
2019	36,879	14,521	51,400
2020	38,354	13,046	51,400
2021	39,889	11,511	51,400
2022	41,484	9,916	51,400
2023-2027	206,412	23,321	229,733
Total	<u>\$ 398,479</u>	<u>\$ 88,254</u>	<u>\$ 486,733</u>

Note 7 – Proprietary Fund Type Non-GAAP Budgetary Basis

The accompanying schedules of revenues, expenditures and changes in available resources, budget and actual (Non-GAAP budgetary basis) for the proprietary fund types, presents comparisons of the legally adopted budget with actual data on a budgetary basis. Since accounting principles applied for purposes of developing data on a budgetary basis differ significantly from those used to present financial statements in conformity with generally accepted accounting principles, a reconciliation of resultant basis, timing, perspective and entity differences in the excess (deficiency) of financial resources over expenditures and other uses of financial resources for the year ended December 31, 2017 is presented below:

Excess of revenues over	
Expenditures (budgetary basis)	\$ 380,228
Adjustments	
Add:	
Capital assets purchased	180,156
Principal payments	56,265
Less:	
Depreciation expense	(124,199)
Net income	<u>\$ 492,450</u>

Town of Norwood
Notes to the Financial Statements
December 31, 2017

Note 8 – State Impact Assistance Grant

During 1988, the Town applied for and received a grant from the Colorado Department of Local Affairs in the amount of \$100,000. The grant proceeds were passed through to the Farmers Water Development Company (FWDC) to finance improvements to the Gurley Reservoir, which the FWDC owns and operates and from which the Town draws its water. In order for public financing of improvements to the Gurley Reservoir to be legal, the funds must be used for public purposes. Since the grant proceeds were passed through to the FWDC, which is privately owned, the terms of the grant agreement include the stipulation that the FWDC will not charge the Town its yearly water assessment until the amount of \$100,000 is exceeded. The Town's yearly assessment in past years had been \$ 500 to \$ 600. The Town has recorded the \$100,000 grant receipts as contributed capital and the resulting prepayment of water assessments as an asset. A period of seventy-five years was used to amortize the prepaid water assessments based on the estimated life of the improvements financed by the grant. Amortization began in 1989 and amounts to \$ 1,333 per year. At December 31, 2017, a total of \$ 41,332 had been amortized, leaving a balance of \$ 58,668 of advanced water assessments remaining unamortized.

Note 9 – Contingent Liabilities

Risk Management

The Town is exposed to various risks of loss related to torts; theft of, damages to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The Town pays an annual premium to CIRSA Property/Casualty and Workers' Compensation for its general liability and workmen's compensation insurance coverage. The agreement with CIRSA will be self-sustaining through member premiums. CIRSA rate-setting policies are established by the Board of Directors, in consultation with independent actuaries. The Board of Directors may credit member municipalities' future contributions in the event of a surplus. Although it has never occurred, CIRSA member municipalities are subject to a supplemental assessment in the event of a deficiency.
