BURN OUT *Tire Mark Remover*

Tire Mark Remover

Burn-Out is used to quickly and easily remove stubborn, set-in tire marks and clean heavily soiled areas. It is a great product to use as a pre-treatment when cleaning with a floor scrubber and it has a pleasant citrus odor.

Directions

Wear safety equipment recommend on the MSDS. Read all Directions and cautions prior to beginning work, remove loose soil and garbage before cleaning floors, and place wet floor signs near work area. This detergent can be diluted for cleaning, but should be used at full strength when removing tire marks.

Application

Burn-Out is an industrial cleaner that should be applied at full strength to loosen set-in soils and tire-marks. This product can be delivered in 5 gallon containers or 55 gallon drums and is easily applied with a garden sprayer.

Professional Recommendations

Burn-Out is best used as a spot cleaner to loosen set-in soils and tire marks. When treating trouble areas, apply a generous amount of Burn-Out to the area and allow the product to dwell for several minutes. The best tool to remove the soil after treatment is an automatic floor scrubber. The best practice is to double-scrub the treated area so that you can get a thorough cleaning and full use of the chemical that has been applied. If you are unfamiliar with double-scrubbing, please ask an MCP associate for a demonstration.

SPECIFICATIONS

Appearance: Clear, yellow liquid
Odor: D-Limonene
Density (lbs/gal)(±0.1 @20°C): 8.55
pH (Conc. ±0.5 @20°C): 12.5
Refractive index (±0.0020 @20°C):
1.3628
Foam generation: Moderate
Stability (40°-120°F): Stable
Freeze/thaw stability: OK 3 cycles
Shelf life (Closed containers, 40°-
120°F): 1 year minimum
D.O.T. classification: Not regulated
Biodegradable (per 16CFR260): Yes
