

# THE **PRODUCT PRESERVERS®** DIFFERENCE

## POWERED ANODE SYSTEM

### EFFICIENT

The Product Preservers® Powered Anode System uses patented adaptive technology that quickly adjusts to your water type providing the precise amount of current needed to deliver the best protection for your water heater tank.

### RELIABLE

Consistent protection is paramount in maintaining the integrity of the steel water heater tank. Built-in LED fault light and audible alarm provides peace of mind knowing the system is working properly.

### SIMPLE

Installation is made easy for professionals with a small control box that can plug into any standard 120 volt wall outlet.

### ADVANTAGES

- Patented adaptive technology quickly adjusts to the local water conditions.
- Continual responsive protection.\*
- Eliminates smelly water issues caused by sacrificial magnesium anodes.
- Protects for years; no maintenance required.
- Great for softened water applications.

\*Protection is maintained as long as the control module remains connected to a power source.

### KIT COMPONENTS

- Control Module with two self-tapping screws
- Anode (electrode)
- Power Supply (Input 120 VAC/ Output to module: 12 VDC)
- Wiring Harness
- Two sizes available:  
30-70 gallon (kit #100305721);  
75-120 gallon (kit #100324744)
