CONDENSATE DRAIN LINE SWITCHES

PAN MOUNTED SWITCHES

Wet Switch® Flood Detector

A solid state control designed to help prevent flooding, damage to carpets, walls, furniture, ceilings, etc. Now has a built in test and reset button for easier installation. Turns system off when detecting moisture due to condensate or drain leaks. One or two drops will cause Wet Switch® to turn off a unit, alerting a serviceman to a moisture problem. A lit LED indicates the Wet Switch® is activated and has turned the unit off. Reset simply by drying the absorbent pad with a paper towel and pressing the reset switch. Connects to 24 VAC. More than one unit may be connected to a system. 2 amp contact rating. Simple 5 wire installation. Sales displays available. ETL Listed File Number 3146992. UL508 Approved.

Pipe Mounted Switches

DiversiTech condensate overflow prevention switches for primary or auxiliary lines are small, simple to install and easy to service reed switch technology. Both are signed designed with a pull-to-test lever to validate installation. As water level in the auxiliary or main drain pipe rises due to a clogged condensate drain line, the switch shuts off the system - thus preventing water from overflowing and causing damage to doors, walls and ceilings. A red LED illuminating light notifies a homeowner/service technician that the switch has triggered. At the heart of the switch is a durable yet precise magnetic reed switch. Constructed of materials that will not rust or stick, both switches are plenum rated, conforming to UL2043 and are UL508 approved.

Condensate Cop™

Condensate Cop™ is a unique clamp on float switch intended for HVAC drain pan installation. The Condensate Cop™ features a large over clamping area that fits easily over the edge of all types of drain pans; including formed plastic and galvanized sheet metal. A separate float/probe assembly swivels to accommodate drain pans having sloped sides. The swivel action allows the installer to position the float switch for best operation and then clamp it into place. The probe features an inlet grill which prevents the float from being blocked or damaged by insulation or other debris. Sealed inside the probe is a magnetically actuated normally closed switch. The switch opens when rising water presents a potential flooding condition. Two wire connection for easy hook up to a thermostat "Y" (compressor) circuit. Provided complete with 5' (1.5 meter) leads, wire nuts, and clamping screws. Small size, 24V/1.5 amp NC reed switch. ETL Listed File Number 3166285. UL508 Approved.

Universal Alarm

A universal low voltage alarm that can indicate possible system trouble. Use with the Wet Switch®, SOS, Condensate Cop, CP 22 (all types) and all float switches on 24VAC control circuits. If an alarm condition exists, the homeowner can turn the alarm off with a "silence" button until service is obtained, however a red trouble LED will remain lit. Also features: easy 2 wire connection, label to print contractor information, and low current draw. Actuates at greater than 18V to prevent any false alarms due to low voltage. Includes 2 wire nuts, a sheet metal screw, and double sided tape for convenient installation options. Also includes instructions for wiring normally open switch systems (for the CP 22 or other condensate pumps).
