

ACCESSORY KIT INSTALLATION MANUAL

STAINLESS STEEL PROPANE LP BURNER KIT (S1-32926889000)

FOR USE WITH MODELS: ALL 33" RESIDENTIAL GAS FURNACES

INSTALLATION FOR 33" MODELS

1. Carefully remove all wires from the burner box and gas valve noting location so they may be properly replaced.
2. Remove the burner manifold and entire burner box assembly.
3. Remove the shoot through plate.
4. Remove the flame sensor and ignitor. Caution: Ignitor is fragile.
5. Remove the burner tray by taking out the two screws located on the bottom of the burner box and sliding out the burner tray.
6. Once the burner tray is out, remove the two 1/4" screws that hold each burner in place.
7. Install the stainless steel burners in place of the removed burners. Any extra burners may be discarded.

IMPORTANT

Position the burner so that the wrap-around edges are against the burner tray. See picture for detail.

8. Reinstall the burner tray, flame sensor, ignitor, shoot through plate, burner box, and burner manifold by reversing the removal process.
9. Refer to the propane conversion kit instructions to complete the propane conversion process. Check all gas connections for leaks using an approved non-corrosive gas leak detection fluid.
