Q14. Directions: Four alternative summaries are given in the text. Choose the option that best captures the essence of the text.

Physically, inertia is a feeling that you just can't move; mentally, it is a sluggish mind. Even if you try to be sensitive, if your mind is sluggish, you just do not feel anything intensely. You may even see a tragedy enacted in front of your eyes and you may not be able to respond meaningfully. You may see one person exploiting another, one group persecuting another, and you may not be able to get angry. Your energy is frozen. You are not deliberately refusing to act; you just do not have the capacity. A. Inertia makes your body and mind sluggish. They become insensitive to tragedies, exploitation, and persecution because it freezes your energy and decapitates it. B. When you have inertia you don't act although you see one person exploiting another or one group persecuting another. You don't get angry because you are incapable. C. Inertia is of two types - physically and mental physically inertia restricts bodily movements. Mental inertia prevents response to events enacted in front of your eyes. D. Physically inertia stops your body from moving; mental inertia freezes your energy and stops your mind from responding meaningfully to events, even tragedies, in front of you.

Direction In view of the passage given below. Choose the best option for question. When talk about how India has done for itself in 50 years of Independence, the world has nothing but praise for our successfully pursuing democracy. On other front, the applause is less loud. In absolute terms, India has not done too badly, of course, life expectancy has increased. So has literacy. Industry, which was barely a fledgling, has grown tremendously. And as far as agriculture is concerned, India has been transformed from a country perpetually on the edge of starvation into a success story held up for others to emulate. But these are competitive times when changes are rapid, and to walk slowly when the rest of the world is running is almost as bad as standing still on walking backwards. Compared with large chunks of what was then the developing world South Korea, Singapore, Malaysia, Thailand, Indonesia, China and what was till lately a separate Hong Kong—India has fared abysmally. It began with a far better infrastructure than most of these countries had. It suffered hardly or not at all during the Second World War. It had the advantage like an English speaking elite, quality scientific manpower (including a Nobel laureate and other who could be ranked

among the world's best) and excellent business acumen. Yet, today, when countries are ranked according to their global competitiveness, it is tiny Singapore that figures at the top. Hong Kong is an export powerhouse, so is Taiwan. If a symbol were needed to how far we have fallen back; note that while Korean Cielos are sold in India, no one is South Korea is rushing to buy an Indian car. The reason list themselves. Topmost is economic isolationism. The government discouraged imports and encouraged self-sufficiency. Whatever the aim was, the result was the creation of a totally inefficient industry that failed to keep pace with global trends and, therefore, became absolutely uncompetitive. Only when the trade gates were opened a little did this become apparent. The year since then have been spent in merely trying to catch up. That the government actually sheltered its industrialists from foreign competition is a little strange. In all other respects, it operated under the conviction that businessmen were little more than crooks, such that, how were to be prevented from entering the most important areas of the economy, how were to be hamstrung in as many ways as possible, how were to be tolerated in the same way as an inexcusable wart. The high expropriatory rates taxation, the licensing laws, the reservation of whole swathes of industry for the public sector, and the granting of monopolies to the public sector firms were the principle manifestations of this attitude. The government forgot that before wealth could be distributed, it had to be created. The government forgot that it itself could not create, but only squander wealth. Some of the manifestation of the old attitude have changed. Tax rates have fallen. Licensing has been all but abolished. And the gates of global trade have been opened wide. But most of these changes were adopted first by circumstances and partly by the foreign exchange bankruptcy of 1991 and the recognition that the government could no longer muster the funds to support the public sector, leave alone expand it. Whether the attitude of the government itself, or that of more than handful of ministers, has changed one with. Business still has to negotiate a welter of negotiations. Transparency is still a longer way off. And there is no exit policy. In defending the existing policy, politicians betray an inability to see beyond their noses. A no-exit policy for labour is equivalent to a no-entry policy for new business. If one industry is not allowed to retrench labour, other industries will think a hundred times before employing new labour. In other ways too, the government hurts industries. Public sector monopolies like the Department of Telecommunication and Videsh Sanchar Nigam Ltd. make it possible for India business to operate only at a cost several times than that of their counterparts abroad. The infrastructure is in a shambles partly because it is unable to formulate a sufficiently remunerative policy for private business, and partly because it does not have the stomach to change market rates for services. After a burst of activity in the early nineties, the government is dragging its feet. At the rate it is going, it will be another fifty years before the government realizes that a pro-business policy is the best pro-people policy. By then ofcourse, the world would have moved even farther ahead.

Direction : Recently, the answers of a test, held nationwide, were leaked to a group of unscrupulous people. The investigative agency has arrested the mastermind and nine other people, A, B, C, D, E, F, G, H and I this matter. Interrogating them the following facts have been obtained regarding their operation. Initially, the mastermind obtains the correct answer-key. All the others create their answer-key from one or two people already possess the same. These people are called his/her 'source'. If the person has two sources, then he/she compares the answer-key obtained for both sources. If the key to a question from both sources is identical, it is copied, otherwise it is left blank. If the person has only one source, he/she copies the source answer into his/her copy. Finally, each person compulsorily replaces one of the answers (not a blank one) with a wrong answer in his/her answer key. The paper contained 200 question; so the investigative agency has ruled out the possibility of two or more of them introducing wrong answers to the same question. The investigative agency has a copy of the correct answer key and has tabulated the following data. This data represents question numbers.

Name	Wrong Answer(s)	Blank Answer(s)
A	46	---
B	96	46,90,25
