

TESTIMONIALS

MUNA GOLD

I work in the in the Emergency Room. For the last six months my husband has been making a ginger tea and putting lozenges into it for me while I am at work. I think that is why I have not got sick.

- Silvia, Physician Assistant Baptist Health Systems, Key Largo Florida

I am 82 years old. The other day I felt like I was getting a cold. I had a sore throat. I took one lozenge and two hours later my sore throat was gone. I took one more lozenge that evening and the next morning I woke up feeling perfectly fine.

- Paul, Galion Ohio

I have been suffering from post-nasal drip for years. This is what prompted me to try the Muna Gold lozenges. After 36 hours and 6 lozenges, my post-nasal drip is slightly better. HOWEVER, the swelling, tightness, and stiffness that I have been experiencing in both ankles for years is COMPLETELY GONE!!!!

- Rob, Key Largo Florida

I was feeling tired. Sinuses were acting up and a pressure headache. I took a lozenge and I felt better. That same day my headache was gone, sinuses cleared up and I felt a bit more energetic.

- Alanna, Tiffin Ohio

I had a stuffy nose for three days. I was given a Muna Gold lozenge and I put it in my mouth. After the first initial nasty taste, I could breathe within 5 minutes. My nose is still clear two days later. I will definitely use Muna Gold.

- Holly, Cardington Ohio

I took a lozenge as I went to bed to see if it would help me breathe through my nose at night. The next day my wife told me I did not snore that night. Since then, I've been taking a lozenge every night as I go to bed. I can breathe through my nose now and most nights I do not snore.

I used to come down with Pneumonia almost every autumn flu season. Fall of 2018 I fell sick as I always did. I was introduced to the lozenges. I took four or five over a day and a half. By the 3rd day I was symptom free. Since, then when I feel like I'm coming down with something, I take one or two lozenges and feel better. I have not gotten anywhere near pneumonia since.

- Lisa, Crestline Ohio

My daughter came down with significant respiratory symptom accompanied with achiness. She took four lozenges a day for four days. The following day she was symptom free.
