Additionally, the Partnership focuses collaborative efforts to include the five-county service area of Baker, Clay, Duval, Nassau, and St. Johns. The CHNAs were conducted to respond to fede ral regulatory requirements and seek to identify significant health needs for particular g eographic areas and populations by focusing on the following questions * Who in the community is most vulnerable in terms of health status or access to care? * What are the unique health status and/or access needs for these populations? * Where do these people live in the community? * Why are these problems present? Primary Data The primary data used in this assessment consist of (1) key informant interviews conducted by phone by HCI, (2) focus group discussions facilitated by HCI and the Partnership, and (3) a community survey dist ributed throughout the service area through online and paper submissions. Over 1,319 community members contributed their input on the community's health and health-related needs, b arriers, and opportunities for Wolfson Children's Hospital's five county service area, with special focus on needs of vulnerable and underserved populations. Over 930 community mem bers contributed their input on the community's health and health-related needs for Baptis t Medical Center Jacksonville's service area. And, more than 1.100 community members contributed their input on the community's health and health-related needs for Baptist Medical Center South's service area. The Partnership especially solicited input from members of or representatives of vulnerable and underserved populations through key informant interview's and focus group discussions. There were 32 Key Informant Interviews, 22 Focus Groups, 21 2 Focus Group Participants, 790 Survey Respondents, and 1,034 total participants Details Of the 32 key informant interviews conducted, 24 interviews were with community experts who either served or represented underserved communities (such as low-income individuals and groups experiencing disparities in health outcomes or health access) In addition, 10 of the focus groups included community members and advocates who are members of underserved communities. Secondary Data Secondary data used for this assessment were collected and an alyzed from HCI's community indicator database The database, maintained by researchers and analysts at HCI, includes over 150 community indicators from 29 state and national data sources such as Florida Department of Health, Florida Behavioral Risk Factor Surveillance System, and American Community Survey. The indicators cover over 20 topics in the areas of health and quality of life. H

These early efforts informed the development of AgeWell, which opened as the region's first and only comprehensive geriatric program in 2012 AgeWell provides an enriched level of specialized, geriatric primary care uniquely designed to meet the needs of our community's medically complex, frail seniors. The Institute provides comprehensive ger latric assessments and utilizes evidenced-based protocols through an integrated, interdisc iplinary care team model The team includes Geriatricians, Gero-Psychiatrist, Psychologist, RN Care Manager, Licensed Social Workers, Clinical Pharmacists, Nutritionist, a rehab te am, and Social Service coordinators.
