Patients with demonstrated financial needs with income greater than 400% of the FPL may be eligible for consideration under a "Means Test" for some discount of their charges for services from the Organization

based on a substantive assessment of their ability to pay. Maximum owed by any patient per episode of care or account is 10% of gross household income. Schedule H, Part V, Section B During the course of the tax year and/or prior to the filing of the return for the taxable year, the filing Hospital Websites organization, which is part of a larger health system, transitioned from a separately hosted website (or websites), to being a part of the health system's centrally hosted hospital website. This transition was intended to facilitate public access to information, including enabling the health system to better manage and monitor compliance requirements that IRC Section 501(r) information be made widely available to the public. During and as a result of the migration of hospital facility information to the new central website, it is possible that there may have been brief instances of web access interruption. If so, the filing organization believes that any such interruptions would have been minor and inadvertent, and due to reasonable cause, and that any such instances would have been immediately addressed when identified. The filing organization and health system have established procedures in place as part of its centralized monitoring and management processes that are reasonably designed to address, monitor and promote compliance with the requirements of IRC Section 501(r). In an effort to be fully transparent, the filing organization has chosen to pro-actively disclose on this Form 990 this possibility of very minor and inadvertent web access interruptions that could have occurred in the normal course of migrating locally maintained hospital facility information to an improved centrally managed website. In so disclosing, the organization is not reporting that interruptions in the nature of a Section 501(r) violation in fact occurred. Rather, the organization is pro-actively disclosing that the migration process was undertaken and that, in completing that process, it is possible that brief interruptions in web access may have occurred as the hospital facility data was relocated to the central website.

Schedule H, Part I, Line 7 Costing Methodology used to calculate financial assistance	The cost of providing charity care, means-tested government programs, and other community benefit programs is estimated using internal cost data, and is calculated in compliance with Catholic Health Association ("CHA") guidelines. The organization uses a cost accounting system that addresses all patient segments (for example, inpatient, outpatient, emergency room, private insurance, Medicaid, Medicare, uninsured, or self-pay). The best available data was used to calculate the amounts reported in the table

To better target community resources on the county's most pressing health needs, the hospital
participated in a group discussion with organizational decision makers and community leaders to
prioritize the significant community health needs while considering several criteria: alignment with
Ascension Health strategies of healthcare that leaves no one behind; care for the poor and vulnerable;
opportunities for partnership; availability of existing programs and resources; addressing disparities of
subgroups; availability of evidence-based practices; and community input. Facilitated by HCI,
participants utilized a prioritization toolkit to examine how well each of the 10 significant health needs
(resulting from analysis of the primary and secondary data) met the criteria. Next, participants ranked
the top 5 most pressing health needs, which were then aggregated by rank. The top 5 most pressing
health needs, as prioritized by the group, will be under consideration for the development of an

implementation plan that will address some of the health issues.
