Form 990 (2017)

Form 990, Part III, Line 4a:

Oncology & Research St Luke's Mountain States Tumor Institute (MSTI) is a wholly owned subsidiary of St Luke's Regional Medical Center and one of the Northwest's most respected cancer care centers. For 50 years, St Luke's has been dedicated to the study, prevention, and treatment of cancer. St Luke's MSTI patients can now receive care in 8 different locations in the communities we serve. A comprehensive offering of pediatric and adult inpatient and outpatient services comprise the St Luke's MSTI community cancer program. These services include medical and radiation oncology, blood and marrow transplant, genetic counseling, breast care, gynecologic, urologic, and hepatobiliary subspecialties as well as a fully integrated supportive oncology program that encompasses cancer rehabilitation, patient financial advocacy, integrative medicine, nutritional counseling, palliative care, psychiatry, social work, spiritual care and survivorship services. Additionally MSTI has a robust clinical research program with specimen banking and a biorepository. All St Luke's MSTI sites are accredited as part of St Luke's Regional Medical Center, Ltd. St Luke's is accredited by the Joint Commission on the Accreditation of Healthcare Organizations. The laboratories serving St Luke's MSTI are certified by the College of American Pathologists. St Luke's MSTI has been accredited by the American College of Surgeons (ACoS) Commission on Cancer since 1977, and is accredited by the Foundation for the Accreditation of Cellular Therapy (FACT). Accreditations are performed on a three-year cycle. Because of its nationally recognized expertise in cancer care, St Luke's MSTI is invited to participate in numerous clinical research protocols in cooperation with regional and national cancer research groups and pharmaceutical companies. Among these research groups are the National Cancer Institute, Children's Oncology Group, and The Pacific Cancer Research Consortium (PCRC), which brings together community cancer treatment centers in the Western United States to form an NCI Community Oncology Research Program (NCORP) Community Site. Since its founding in 1969, St Luke's MSTI has been committed to cancer research. Physicians at St Luke's MSTI strongly endorse clinical trials. The focus of oncology professionals is on improved cure rates, more effective treatments with fewer side effects, longer survival, and improved quality of life. Clinical research advances science and ensures that patient care approaches the highest possible level of quality. Patients who participate in clinical trials have the opportunity to advance evidence-based medicine. More recently, society requests we help them understand the cost of treatment—examining not just financial obstacles, but social and resource-draining obstacles as well. This clinical research work is known as Cancer Care Delivery Research. As St Luke's MSTI has grown, the commitment to research has deepened. While the vast majority of research activity has involved participation in cooperative group trials, St Luke's MSTI also participates in pharmaceutical-sponsored and investigator-initiated clinical research. Clinical research services are available at all five St Luke's MSTI cancer treatment clinics throughout Southwest and South Central Idaho. These clinics represent the regional direction of the entire St Luke's MSTI program. Adult medical, gynecologic, urologic, hepatobiliary, and radiation oncology research studies are offered at all St Luke's MSTI facilities. Pediatric and autologous stem cell transplant research opportunities are offered only at the Boise site. The St Luke's MSTI research mission is "To improve outcomes and quality of life of patients with cancer and blood disorders through research." Its vision is "To transform cancer care by aligning with MSTI physicians and other providers to deliver advanced, quality, seamless patient care and help patients achieve their best outcome and quality of life across the cancer care continuum." St Luke's MSTI's pediatric and adult research programs undergo regularly scheduled external auditing, and continue to satisfy all requirements for conducting compliant research. Approximately 41 clinical trial opportunities are available for adult patients, and approximately 46 protocols are available for pediatric oncology patient enrollment. In addition to therapeutic protocols, registry and biorepository studies are also offered at St Luke's MSTI Breast Cancer Detection Centers. Created in 1973 as one of only 20 survey projects of the National Cancer Institute, St Luke's Breast Cancer detection centers (BCDC) have been serving women with low-cost mammography, breast examination, and education for decades. Most of St Luke's BCDC sites feature the latest in breast screening technology. Full field Digital Mammography. MSTI has eight stationary sites in five separate Idaho cities (Boise, Meridian, Caldwell, Mountain Home, and Ketchum), and two diagnostic centers in Boise and Meridian. In addition, MSTI has one mobile unit that travels to 11 counties.
