

# Quad Plus™

## Oil AND GAS

### EXPERIENCE

Quad Plus is an industry leading systems integrator providing service and solutions for all aspects of the petroleum industry, including fixed base, land based, and offshore equipment. Quad Plus professionals have the experience to understand your requirements and work within industry constraints.

Pioneering new applications for industrially tested electrical systems, Quad Plus professionals are at the forefront of design for electrically-powered oil field equipment as well as power applications for exploration and production tools.

### SERVICES

Our technicians specialize in oil and gas equipment. We understand its complex and harsh conditions and have the skills and certifications to mitigate personal risk while servicing and transporting equipment.

Quad Plus provides equipment and services in a wide variety of forms. Whether repairing, retrofitting, or devising new equipment according to your requirements, our technical team will assist with design selections from our wide range of experience.

### E-FRACKING

Traditional hydraulic fracturing spreads can include from 15 to 30 trailer mounted tools, each powered by its own diesel engine. Thanks to innovations providing high capacity remote power generation, the electrification of traditionally diesel-powered equipment offers powerful opportunities for improved returns on investment from efficiency, reliability, lower emissions, and reduced noise levels.

Our continuing work with client E-Frac projects has produced innovations for power distribution, control, and safety systems to enable construction low and medium voltage powered well completion equipment.

Our technical team continues to build on past developments to provide next generation designs.

## About Quad Plus

Quad Plus provides industrial control systems, solutions, and services. We offer an uncompromising level of service and expertise to maintain our customers' productivity. Our extensive process knowledge spans from the utility pole to the motor shaft. With an on-going commitment to follow-up service, parts, and repairs, we are all you need for continued success.

We are recognized in the field as a leader in drive and motor control. Solutions are designed in-house through research and development tailored to meet each client's specific needs. Our design staff includes electrical, mechanical, civil/structural, chemical, and controls.

### FACILITIES

- Chicago, IL
- Atlanta, GA
- Appleton, WI
- Houston, TX

### SATELLITE FACILITIES

- Boston, MA
- Evansville, IN
- Fort Myers, FL
- Mobile, AL
- St. Louis, MO
- Bend, OR
- Los Angeles, CA
- Kansas City, MO

LARGE DRIVES - AUTO SHREDDING
