

LOCAL AND GLOBAL PARTNERSHIPS

WHO WE ARE

The commercial roofing industry has relied on Sarnafil® brand thermoplastic single-ply membranes from Sika for more than 50 years to achieve sustainable roofing and waterproofing solutions. The company manufactures long-lasting membranes and systems, vapor retarders, insulation, fasteners, adhesives and proprietary hot-air seam welding equipment.

Sika AG, Switzerland, is a globally active specialty chemicals company. Sika supplies the building and construction industry as well as manufacturing industries – included are automotive, bus, truck, rail, solar and wind power plants, and façades. Sika is a leader in processing materials used in sealing, bonding, damping, reinforcing and protecting load bearing structures. Sika's product lines feature high quality concrete admixtures, specialty mortars, sealants and adhesives, damping and reinforcing materials, structural strengthening systems, and industrial flooring in addition to roofing and waterproofing systems.

Our most current General Sales Conditions shall apply. Please consult the Product Data Sheet prior to any use and processing.

BUILDING TRUST

BUILDING TRUST

WHAT IT MEANS TO BE PART OF THE SIKA SARNAFIL PARTNERS CLUB

The installation of a high quality roof requires a partnership between roofing contractor, specifier and product manufacturer. Working together, the partners in the process are able to deliver a quality solution that meets the building owner's needs.

Sika® sells directly to a limited group of authorized applicators to assure that only trained, qualified contractors are able to participate. The benefits of membership vary with your status. Each contractor is rated based on a number of technical and business criteria, including quality of installations, warranty expenses, degree of business support and payment history. The Partners Club consists of three levels of membership: Elite, Alliance and General, with Elite being the highest rated level with the most benefits.

Elite level partners have demonstrated an unparalleled commitment to quality and the roofing industry. Sika works closely with these contractors to develop our businesses together. Co-op marketing funds are made available to jointly promote our companies through such activities as customized direct mail programs, billboards, aerial photography, contractor and project profiles, and building and truck signs.

Our sales force works closely with our Elite partners to develop job opportunities and to turn those opportunities into loyal customers.

In addition, we assist our Elite partners in keeping their businesses moving forward by providing an Early Bird warranty program which allows issuance of the roof warranty prior to project completion.

Applicator Support Services ... Your Key to Success

Local Presence – Sika operates eight regional offices throughout the country to support your local needs. Regional sales people work closely with you to develop new opportunities and support your business with Sika. Technical support is also provided on a regional level to provide timely technical advice and inspections.

Business Development – From lead generation and specification development to negotiated bid opportunities, Sika is dedicated to developing job opportunities for you. Our marketing department works closely with our inside and field sales people to convert product interest into project opportunities and loyal customers.

Technical Support – Sika is highly respected for its attention to the quality of the installation of its products and systems. We have a large number of field technicians located throughout the country who work together with you to assist with the installation process. Technical representatives are available before, during and after each roof installation.

The Sika Difference

Increased Productivity – Sika membranes are preferred by roofing crews. Our high quality, flexible vinyl membranes are easy to work with on roof details and when welding seams. Our Sarnamatic 661 SpeedWeld® sets a new standard in hot-air welding machines. A revolutionary new nozzle design provides up to 50 percent more speed than other automatic hot-air welders.

System Options – We offer a wide variety of membrane and system choices, making it easier to use Sika on more projects. From our unique Décor Roof System that simulates the look of a metal roof to the energy saving EnergySmart Roof® membranes, and from our Sikaplan and colored membranes to roof graphics, we offer numerous options to meet the building owner's needs.

Uncompromised Quality – Sika is known throughout the world for its uncompromising dedication to the highest quality membranes and roof systems. Our products have proven to stand the test of time on all types of buildings all over the world.

Sika Milestone Management

Proven Materials – A high quality membrane is the key to any successful roofing or waterproofing project that demands absolute system integrity. Sika's manufacturing processes use only the highest quality materials to produce a membrane that offers excellent weatherability and dimensional stability.

Expert Assistance – Our skilled technical experts make Sika stand apart from other manufacturers, and our technical representatives are heavily involved before, during and after each job.

Skillful Workmanship – Sika works with a select group of trained, authorized applicators – only the best are invited to join our team. Maintaining strict control over the installation process means that Sika quality is carried through from start to finish.
