

Sarnafil® G 410 SELF-ADHERED MEMBRANE

Improve your installation productivity and eliminate solvents, VOCs and odors with the Sarnafil G 410 Self-Adhered thermoplastic roofing membrane.

This membrane provides all of the benefits of a Sarnafil adhered roofing system without the hassle and mess of liquid adhesives. Simply peel back the adhesive release liner and bond the membrane to an approved substrate.

The Sarnafil G 410 Self-Adhered membrane is the easier, faster way to install an adhered roofing membrane.

- No solvents, VOCs or odors
- Install in temperatures as low as 20°F
- No membrane adhesives to ship or store
- Factory-applied adhesive for quality assurance
- No cure time
- One-step process
- Reduces waste
- No hazmat transportation
- Reduces labor

APPLICATION STEPS

AVOID VOC-RELATED ISSUES

It's no secret that VOCs from liquid adhesives can be an issue on certain types of jobs. By eliminating the use of membrane adhesives, you also eliminate VOCs and adhesive odors from entering the building.

QUALITY ASSURANCE

With the Sarnafil G 410 Self-Adhered membrane, the adhesive is pre-applied at the factory, assuring more consistent coverage versus applied on site.

HEAT UP YOUR PRODUCTIVITY

In many cases, installing an adhered system during cold parts of the year is extremely difficult due to low daily temperatures. Sika Roofing's Sarnafil G 410 SA membrane offers the ability to install an adhered system in temperatures as low as 20°F, allowing for a wider install window.

A VERSATILE OPTION

The Sarnafil G 410 Self-Adhered membrane is ideal for any project, but especially for those buildings that are sensitive to adhesive odors and fumes:

- Schools and universities
- Healthcare facilities
- Office buildings
- Pharmaceutical facilities
- Retail facilities

In addition, the G 410 Self-Adhered membrane is the perfect solution for high-rise applications where torches and open flames are not allowed.

DISCOVER A NEW ALTERNATIVE
