Subject: Sikasil SG-15 Silicone Sealant

17-01

Sika Corporation – Roofing is pleased to announce the addition of Sikasil® SG-15 silicone sealant to Sika's roofing and waterproofing product line.

Sikasil® SG-15 is a versatile one-component, non-sag, elastomeric, neutral cure silicone sealant used in Sarnafil® and Sikaplan® roofing and waterproofing system details. It is available in gray and is packaged in 10 oz (295 ml) disposable cartridges with 24 disposable cartridges in a case.

Sikasil SG-15 is used at wall and curb terminations, pipe penetrations and metal flashings. It is not to be used in drain details or as sealant around reinforcing steel or dowels that are located on the structural deck.

Sikasil SG-15 is compatible with Sarnafil and Sikaplan membranes and is the only silicone sealant approved for use in Sarnafil and Sikaplan roofing and waterproofing systems.

Standard maintenance of roofs should include regular inspection of flashings, drains and termination sealants as well as pourable sealer pockets at least twice a year and after each storm. Maintenance of this sealant or of any other sealant after the original installation and application is not covered by the Sika Corporation warranties.
