

Natural Worlds

VIRGINIA LANGLEY

A Cortina Leathers luxury collection by Virginia Langley

Discover a collection that reflects the range of colors, textures, dimension, and beauty found in the natural world. Curated by interior design authority Virginia Langley, Natural Worlds hand-rubbed metallic finish adds a glimmer to light up any interior. These selections are overlaid with a textural finish that enhances the natural grain. Surround yourself with the subtle neutral hues and grains of a sandy beach, the iridescence of a precious seashell, the rich colors of a stunning sunset, the shimmering blues of the sea. Illuminate your space with the allure of Natural Worlds.

Environmental Stewardship: Natural Worlds is lead free and emits low VOCs.

Performance Category 1

Leathers with Performance Category 1 are considered by many to be the most beautiful and authentic leathers, most likely because they are least protected. These leathers include pure anilines, aniline leathers with less protection, nubuck leathers, suedes, etc. All Category 1 leathers are protected with water repellency to resist water spotting and are expected to patina, wear and age gracefully over time, making them perfect for many applications. However, these leathers are not recommended for uses where they will be subjected to heavy staining, abrasive wear or direct sunlight. More information is available on our website at cortinaleathers.com/resources/performance/.

VIRGINIA LANGLEY

Care Codes (continued)

Performance Category 2

Leathers with Performance Category 2 retain their natural appearance while carrying additional protections against abrasion, staining and color fading. Aniline leathers with some protection and semi-anilines are found here. These leathers are suitable for a wide range of applications across a wide range of wear and stain risk, such as those found in commercial settings and dining areas. More information is available on our website at cortinaleathers.com/resources/performance/.

Care & Cleaning Code 2

Aniline leathers are designed to age gracefully, increasing in beauty over time. Very little care is required—general upkeep requires only an occasional dusting with a clean cloth. Never use oils, saddle soaps, harsh cleaners or cleaners containing abrasives on aniline leather. Periodically, you may wish to gently wipe the leather with a clean, slightly damp cloth to remove accumulated soil and allow it to air dry. Should a spill occur, remove immediately to avoid permanent discoloration by blotting (pressing gently without rubbing) with clean, dry sections of an absorbent cloth. Should soiling remain, a solution of lukewarm water and a mild soap such as Ivory® or a mild cleanser such as Woolite® may be used. Dampen a clean white cloth in the solution and gently wipe the affected area using a circular motion. Never apply the solution directly to the leather. Rinse completely with clean cloth which is damp with plain water until all cleaner is removed. Blot dry with a paper towels or dry cloth and allow to completely air dry. It may be necessary to repeat this procedure, allowing the leather to completely dry between applications. To avoid harming the leather, do not rub vigorously or for an extended period. It may not be possible to remove all stains from this natural product. More information is available on our website at cortinaleathers.com/resources/care-cleaning/.

Care & Cleaning Code 3

Semi-aniline leathers are protected against scratching and scuffing and designed to maintain their beauty over time. Very little care is required—general upkeep requires only an occasional dusting with a clean cloth. Never use oils, saddle soaps, harsh cleaners or cleaners containing abrasives on semi-aniline leather. Periodically, you may wish to gently wipe the leather with a clean, damp cloth to remove accumulated soil, then allow it to air dry. Should a spill occur, blot (pressing gently without rubbing) immediately to avoid permanent discoloration with clean, dry sections of an absorbent cloth. Should soiling remain, a solution of lukewarm water and a mild soap such as Ivory® or a mild cleanser such as Woolite® may be used. Dampen a clean white cloth in the solution and gently wipe the affected area using a circular motion. Never apply the solution directly to the leather. Rinse completely with clean cloth which is damp with plain water until all cleaner is removed. Blot dry with a paper towels or dry cloth and allow to completely air dry. It may be necessary to repeat this procedure, allowing the leather to completely dry between applications. To avoid harming the leather, do not rub vigorously or for an extended period. It may not be possible to remove all stains from this natural product. More information is available on our website at cortinaleathers.com/resources/care-cleaning/.

Care & Cleaning Code 4

Semi-aniline and pigmented leathers are resistance to wear, scratching and staining so they require very little maintenance to maintain their beauty over time. General upkeep requires only an occasional dusting with a clean cloth. Periodically, you may wish to gently wipe the leather with a clean, damp cloth to remove accumulated soil and allow it to air dry. Leather conditioners and protectants, such as those by Leather Master® can be used as directed. Should a spill occur, blot (pressing gently without rubbing) immediately using clean, dry sections of an absorbent cloth or paper towel. Should soiling remain or for a more thorough cleaning, Cortina Leathers Universal Cleaner High-Tech Wipes® or a solution of lukewarm water and a mild cleaner, such as Ivory® soap or

Woolite®, may be used. Dampen a clean white cloth and gently wipe the affected area using a circular motion. Rinse completely with clean sections of cloth which is damp with plain water until all cleaner is removed. Blot dry with paper towels or dry cloth and allow to completely air dry. Repeat the cleaning process as needed, allowing the leather to dry between applications. While it is possible to remove many deep stains and soiling from semi-aniline and pigmented leathers, it may not be possible to remove all stains from this natural product.
